Re: Re: Proposals for CIVA

Dear Michael,

Could you transfer following proposal to CIVA from the delegate of Norway.

1. Exception to proposal deadline. We believe that the present proposal deadline for proposals should be considered advisory - ie that CIVA should accept to act on proposals made later than the present deadline. It seems to be rather normal that developments during any years championships or other developments during the summer will give reasons for proposals to CIVA. CIVA should not be put in the position that important changes / proposals cannot be acted upon because the "deadline" for proposals has passed.
2. In this connection we suggest that the "informal" meeting of a majority of the experienced delegates the day before the planetary meeting should be made into a regular event. We believe that the informal meeting in Prag last year was most valuable and actually made the efficient run of the formal meeting possible.

Tor A. FUSDahl
