KÜCHLER, Philippe	SUI	15.7	3.5	
LOUVEL, Remy	FRA	18.4	5.9	
GAWECKI, Jan	POL	18.5	10.3	
HAPPS, Dick	GBR	18.8	5.8	
TALABOS, Gabor (Jr.)	HUN	23.9	7.8	
CORRIAS, Lina	ITA	27.5	7.2	
KORINEK, Tomas	CZE	28.3	12.2	
BINDER, Manfred	GER	No Data	No Data	

Notes:

Average RI: this figure is calculated across all contests judged (2003 to 2007). The judges are sorted into order based on this column. Lower RI is better.

Standard Deviation of RI: This number shows how variable (consistent) the judge is across contests. A judge whose RI remains pretty similar across all contests will have a low Standard Deviation. A judge who is inconsistent (sometimes posts a very low RI and sometimes a very high RI) will have a high standard deviation. It is important to think about the Average RI (third column) and the Standard Deviation RI (fourth column) when assessing the performance of a judge - especially if a judge has a Standard Deviation of 10+, which means (s)he is very inconsistent.

Highlighted: Those 7 judges highlighted in **yellow** are selected. Remaining judges will be invited to occupy one of the 3 (maximum is 10) remaining positions at their own expense, however, organizers are urged to give every assistance to non-selected Judges as well.

Nationality: Current rules do not permit more than one judge from the same country. Therefore, the judge next in the rank order was selected in the case of more than one judge applicant per country.
