

**PROPOSAL FROM THE AUSTRIAN AERO CLUB FOR A  
RECALCULATION OF THE IGC RANKING LIST WITH THE NEW RULES.  
15 December 2006**

**It is proposed:**

to recalculate the IGC Ranking list from the beginning in 1999 with the new rules defined in Annex D.

**Reasons for supporting the proposal:**

- the old rules were not always clear, so it was not clear how to do the calculation
- some calculations were done in a different way to make it manageable
- we do not have a difference between cat2 and cat2+ any more
- to get a transparent system we need to do it according to the new rules
- we need a transparent and clear system to promote it with the media
- to continue the calculation with the current standings is not possible, calculation is always based on 4 to 5 years history.

It is possible to solve all these problems by doing a recalculation.
