

Subject:	CZECH PROPOSALS TO AMEND CANOPY PILOTING COMP. RULES	Annex No. -	48
Author:	Jiri Blaska, IPC Delegate, Czech Republic	Agenda ref. -	19.4.2
Date:	02 December 2013	Page	1 of 1

Section 4.9. Wind Conditions

Change 4.9.1. We propose the maximum wind speed 5 m/s for the Accuracy event, or at least a limitation for flying this discipline down the wind.

(note: It is due to the safety of the competitors!)

Section 5. Speed

Change 5.5. We propose the compulsory use of video cameras at all gates for First and Second Category FAI events

Section 6. Distance

Change 6.5. We propose the compulsory use of video cameras at all gates for First and Second Category FAI events

Section 7. Accuracy

Change 7.5.1. Add the text of the compulsory use of video cameras at all gates for First and Second Category FAI events

Change 7.5.2. Add the text of the compulsory use of video cameras at all landing zones for First and Second Category FAI events

Addendum A - General Course Specification

Electronics sensor 9.

We propose the compulsory use of video cameras for all gates and for the Accuracy event the compulsory video cameras at all landing zones

Addendum D – Accuracy Course Specification

Change 4.5. - 4.6. We propose the compulsory use of video cameras for all gates and all landing zones

Addendum F

1b) Cancel the straight speed and leave there only the carving speed

Besides the changing of the rules for a greater safety and more objective evaluation of the competitors, we introduce the following proposal to IPC meeting:

We propose the evaluation of the teams in Canopy Piloting. National Team would consist of four members. The evaluation would be similar to the one in Style and Accuracy event.
