22nd April 2007

Mr Max Bishop
Secretary-General, FAI
Avenue Mon Repos 24
1005 Lausanne
Switzerland

Dear Max

At the 2006 FAI General Conference a proposal was received from the President of CIMP to create four new Technical Commissions.

The IGC Plenum considered this proposal at our meeting in March 2007 and endorsed the following resolution:

**That the IGC support the establishment of an FAI Airspace and Navigation
Technical Commission**

We appreciate that considerable work has to go into deciding if the FAI has the capability to undertake such work, however, my Commission would see the formation of such a Technical Commission as valuable.

We would ask that, as part of its Terms of Reference, that this Commission be required to work closely with both Europe Air Sports and the European Gliding Union.

Yours sincerely

Bob Henderson
President, IGC
