

IGC 2024 Plenary Meeting Report

Handicap Committee

Christof Geissler, Chairman
February 2024

20m Multi-Seat class:

Last year, it was decided to put the new version of DG1000/1001 with MTOM of 790kg into the handicap list with an IGC Handicap of 1,01. Since there was no DG1000 with MTOM 790kg competing in EGC 2023, we decided to publish the update of the handicap list of the 20m Multi-Seat class shortly after the plenary meeting 2024.

IGC Club Class:

Looking at results of international championships, the handicap committee worked on an update of the IGC Club Class handicap list. The outcome is shown on the attached presentation which has been prepared by Kai Rode-Brandenburger.

Publication of the new Club Class handicap list is planned together with the list for the 20m Multi-Seat class shortly after the plenary meeting 2024.

I'll be available during the plenary meeting for your questions.

Thanks a lot to the members of the Handicap Committee: Russel Cheetham, Tobias Geiger, Denis Guerin and Kai Rohde-Brandenburger for their expertise; big thanks to Kai for his analysis and preparation of the attached presentation.

Best Regards

Christof
