

Records Subcommittee Report

Mr. Art Greenfield, Chairman of the Records Subcommittee noted there were no changes to Section 2 of the FAI Sporting Code for 2022. He noted that Powered Airplane records activity has been down the past two years due to COVID-19, but there are signs that things are beginning to pick up again and he is hopeful that next year we will see normal levels of activity.

He asked that all records questions for the subcommittee be coordinated through the NAC and not be submitted directly by the contestants. It is the NAC's responsibility to administer the Sporting Code and the NAC should be fully engaged in any discussions relating to records.

Lastly, he reminded the delegates that any IGC or GAC-approved flight recorders that are to be used to document record attempts in Section 2 must comply with the accuracy requirements in paragraph 3.1.8 of the code. Not all "approved" flight recorders meet those accuracy requirements.
