1 INTRODUCTION

1922 saw the first meeting of the FAI Medico-Physiological Commission CIMP. Since then, aeronautics have evolved spectacularly, and so has aviation medicine. During all these years of progress, CIMP has been upholding its mission to study the medical and physiological factors that influence human performance and behaviour in the air sports environment.

A century after its foundation, the CIMP bureau would like to celebrate all the work achieved by the Commission which is due to the dedication of its members.
