FAI/ CIAM Positions:
Subcommittee Chairman
F3 Radio Control Pylon racing

F3D Pylon race finalists Tours, France Sep. 2021

Dibden/United Kingdom,
November 19th , 2021

CIAM Subcommittee F3 Radio Control Pylon Racing Report 2021

2021 is my first year as sub committee Chairman having taken over from Rob Metke-meijer, in May 2021. I retained the existing sub-committee that Rob had in place and this comprises of 22 technical experts from 19 separate countries.

New rules for 2022 were discussed at sub-committee level and then voted upon successfully in the 2021 Plenary meeting.

As with all activities F3 Pylon racing was severely effected by Covid 19 during 2021, however as soon as local regulations permitted then racing took place with good caution in place.

2021 was the first year for F3 Pylon World Cup events so this was not the greatest start for us in this format of competition, nevertheless organisers and competitors showed resilience and we have results.

F3 Pylon World Cup results 2021

F3D	F3E	F3T
1 st Bram Lenjtes	1 st Joris Crevecoeur	1 st Gerald Coors
2 nd Andreas Kaiser	2 nd Jiri Klein	2 nd Paolo Mucedola
3 rd Achim Kaiser	3 rd Tomas Andriik	3 rd Leon Uher

The F3 Pylon sub-committee have supported the organisers of the 2022 F3D/F3E World Championships where required and preparation for this event is going well.

In our sub-committee we will be creating a medium term plan (6 to 8 years) for the future of pylon racing on a Global scale, we believe that there is good potential for increased participation and particularly so in countries that have not been traditional homes for RC pylon racing.

I would like to thank the CIAM Bureau for the help and encouragement that they have given me in my first year in office. Of course I would also like to thank the F3 Pylon sub committee experts for their support in my first year as Chairman.
