For Event Organisers

- Provide a system that allows event organisers to create and customise registration forms for their events using template fields and custom fields.
- A system that allows event organisers to view, manage and export registrations.
- A system that allows event organisers to automatically populate WMF Pilot Lists from registrations.
- Manage and display pilot nominations and invitation/payment status (e.g. for World Championships). This functionality is already live (see 2023 Women's Worlds)

For Pilots

- Ability for pilots to register via the WMF website
- Pre-populate fields with existing profile/pilot information (e.g. WMF biography)
- Ability for pilots to save uploaded documents for future event registrations.

Ability for pilots to save form after partial completion

RECORD FLYING WITH BALLOON LIVE

2-page guide & checklist (based on a German experience)

Free event created on WMF for each NAC

Date: March 2023

AIM OF THIS DOCUMENT

This document is based on several record flights organized and flown in Germany. Following the experience shared by the pilots, the official observers and the persons in charge of national records certification in Germany, the following recommendations and guidelines have been established to help any NAC in setting up procedures for pilots to fly records in their country.

The proposed procedures have been established in a way to make official observing of record flights easy and the checking and validation of the flight data secure and quick.

needed.

REQUIREMENTS AND PREPARATIONS

An NAC interested in setting up record flying using Balloon Live and WatchMeFly must first contact the Balloon Live team by filling out an "event" setup request using the form available on balloonlive.org. No payment is needed to set it up.

The following steps and setups are required before a flight:

- Watchmefly.
- Pay the registration fee in the app.
- Check all pilot and balloon documents and licenses. You must have an FAI sporting license.
- Check if a internet connection is available at the planned take off site. Otherwise an online-coordination with the official observer is not possible.

EQUIPMENT

- The following equipment is necessary:

Ball()()n

GUIDE FOR NATIONAL RECORD FLYING USING BALLOON LIVE

All necessary data can be transferred in real time and stored on Watchmefly. Setting individual permissions for each country will give the official observer and the organising NAC access to all the flight information and data

- If not yet done, create an account on watchmefly net.
- Register as a pilot by contacting the organising NAC or the coordinator nominated by the NAC Await confirmation from the organising NAC that you are registered in the NAC's record flying "event" in
- Install the Balloon Live app and select the event in the competition mode.
- General coordination with the official observer regarding the planned flight.

Balloon Live sensor (BLS) with the latest firmware (see balloonlive.org)

The BLS provides the position and altitude data for the Balloon Live recording through a permanent connection to the recording device (see next item)
