

CIVL 2022 PLENARY – ANNEX 33J
SLOVENIA – PROPOSAL FOR S7A

1. Recommendation

Shorten the recording interval from 5s to 1s.

Current rule

4.4.1 Minimum Track Log Points

The interval between points in the track log must be set to 5 seconds or less.

A pilot's track log must contain sufficient track log points to verify all control features of the task that has been set, except that 4.3.2 may be applied for a start. In the event of doubt about track log validity 4.4.6 will apply.

Recommendation

4.4.1 Minimum Track Log Points

The interval between points in the track log must be set to **1 second** or less.

A pilot's track log must contain sufficient track log points to verify all control features of the task that has been set, except that 4.3.2 may be applied for a start. In the event of doubt about track log validity 4.4.6 will apply.

Comment: There is no need to keep 5s interval with today's instruments. Also pilots are bringing backup instruments with 5s interval just to get lesser penalty for airspace infringements
