

Stephane's last report as CIVL President

Belgrade 2015

Many plenaries and Delegates since Sinaia 2003

Thank you!

Bali 2014

Not much of a performance if you
compare it with Yoshiki's first plenary
Kossen 1976!

Jioa-Xi
2012

Stef's 3 reports

- 2022-2023: Business as usual
- 2015-2023: An analysis
- 1987-2023: A Commission Presidents Group review

Business as usual

- Successful events
- EMS in operation
- Struggling with software (AirScore)
- CCC stabilised
- Physical meetings (plenary & bureau)

Business not so usual

- Raise – or not – sanction fees
- Stabilise – or not – our reserve
- Events in countries with no NACs
- Events in countries whose NACs are not “in good standing”

If we had a motto

- Be professionnal
- Be autonomous
- Keep investing

2015-2023 Analysis

Stability: Bureau and Committees

Belgrade 2015

2015-2023

Progress

- Basecamp
- Administrator
- Event Management System
- CCC gliders
- Live-trackers – Accuracy target
- Reorganisation of our rules
- Communication

2015-2023

Issues

- World Air Games – Asian Games
- 2015-2019 – EB bossing us around
- 2020-2023 – Still not One-FAI but multiple silos with no common project: EB-ASC-NAC
- EB and Secretariat serving the structure, not the sport

Commission Presidents Group

- Only properly used by David since 2020
- Nice place to discuss, but...
- Sometimes ignored
- Often not heard

The CPG still has to discover its own power

The Future

- Optimistic: CIVL is strong
- Pessimistic: FAI governance & finances
- Continuity with a new President
- I'll stay available to help

We fail when we don't work enough
