RIGHTS TO FAI INTERNATIONAL SPORTING EVENTS

All international sporting events organised wholly or partly under the rules of the Fédération Aéronautique Internationale (FAI) Sporting Code¹ are termed *FAI International Sporting Events*². Under the FAI Statutes³, FAI owns and controls all rights relating to FAI International Sporting Events. FAI Members⁴ shall, within their national territories⁵, enforce FAI ownership of FAI International Sporting Events and require them to be registered in the FAI Sporting Calendar⁶.

An event organiser who wishes to exploit rights to any commercial activity at such events shall seek prior agreement with FAI. The rights owned by FAI which may, by agreement, be transferred to event organisers include, but are not limited to advertising at or for FAI events, use of the event name or logo for merchandising purposes and use of any sound, image, program and/or data, whether recorded electronically or otherwise or transmitted in real time. This includes specifically all rights to the use of any material, electronic or other, including software, that forms part of any method or system for judging, scoring, performance evaluation or information utilised in any FAI International Sporting Event⁷.

Each FAI Air Sport Commission⁸ may negotiate agreements, with FAI Members or other entities authorised by the appropriate FAI Member, for the transfer of all or parts of the rights to any FAI International Sporting Event (except World Air Games events⁹) in the discipline¹⁰, for which it is responsible¹¹ or waive the rights. Any such agreement or waiver, after approval by the appropriate Air Sport Commission President, shall be signed by FAI Officers¹².

Any person or legal entity that accepts responsibility for organising an FAI Sporting Event, whether or not by written agreement, in doing so also accepts the proprietary rights of FAI as stated above. Where no transfer of rights has been agreed in writing, FAI shall retain all rights to the event. Regardless of any agreement or transfer of rights, FAI shall have, free of charge for its own archival and/or promotional use, full access to any sound and/or visual images of any FAI Sporting Event. The FAI also reserves the right to arrange at its own expense for any and all parts of any event to be recorded.

 - 10 FAI Sporting Code, Gen. Section, Chapter 2, para 2.2.
 - 11 FAI Statutes, Chapter 5, para 5.2.3.3.7
 - 12 FAI Statutes, Chapter 6, para 6.1.2.1.3

Editor's Note:

The FAI Sporting Code for Hang Gliding (hang gliders and paragliders) consists of the General Section and Section 7 combined. Section 7 consists of this section and the relevant discipline subsection. In cases of doubt, consult the General Section to establish the principles before applying the specific rules which appear in Section 7.

Hang gliding (hang gliding and paragliding) is a sport in which both men and women participate. Throughout this document the aim is to maintain a gender neutral stance.

1. INTRODUCTION

1.1. **Description**

Common Section 7

- Common rules and recommendations for all Category 1 and Category 2 events across all Hang gliding and Paragliding disciplines.

Discipline specific subsections:

- Section 7A. Hang Gliding (Classes 1, 2, 4, 5) and Paragliding (Class 3) Cross Country.
- Section 7B. Paragliding (Class 3) Aerobatics.
- Section 7C. Paragliding (Class 3) Accuracy.
- Section 7D. Records and Badges (all Classes).
- Section 7E. WPRS (CIVL Ranking)
- Section 7F. XC Scoring (CIVL GAP – Centralised Cross Country Competition Scoring) (All classes for Cross country discipline).
- Section 7G. CIVL Competition Class(CCC) – Paragliders permitted in FAI Category 1 Cross-Country events (Class 3).
 - Section 7H. CIVL Flight Recorder Specification (All classes).
 - Section 7J. CIVL Jury Guidelines

Section 7I Guidelines and Templates:

- General safety meeting.
- Assistance to a pilot in danger.
- Thermalling rules and techniques.
- Notes on airspace definition.
- Notes on GAP.
- Participant incident policy.
- Preparing a protest.
- Local Regulations for cross country events (template).
- Local Regulations for aerobatic events (template).
- Local Regulations for accuracy events (template).
- Entry form (template).
- Waiver form (template).
- Paraglider pilot XC experience (template).
- Certified glider statement: Cross Country hang gliders (template).
- Certified glider statement: Cross Country paragliders (template).
- Certified glider statement: Aerobatic paragliders (template).
- Certified glider statement: Accuracy paragliders (template).
- Protest form for FAI Category 1 events

Annexes:

- Section 7 C CIVL Paragliding Accuracy Judging Code.

Other documents (this list is indicative):

- Guidelines for presentation of bids to hold FAI/CIVL Category 1 Championships.
- Practical Guidelines for CIVL/FAI Category 1 Competition Organisers.
- FAI International Jury Members Handbook.
- CIVL Jury Members Handbook.

- CIVL Steward Handbook.
- FAI Guidelines in the event of a casualty or a serious accident at FAI Air Sports.
- Protocol for Award-Giving at Closing Ceremonies at FAI Championships.
 - About FAI.
 - Code of Conduct - Air Sports and the Environment.
 - FAI Anti-Doping Program.
 - FAI Code of Ethics.
 - Naming of Competitions: policy for Air Sport Commissions and Competitions Organisers.
 - FAI Branding (Styleguide and Logos).
 - Rules on Advertising for FAI Air Sport Events.
 - FAI Anthem.

Note 1: Separate subsections may be created in future for sub-disciplines such as hang gliding aerobatics and speed gliding or paragliding speed riding, if a regular and viable sequence of Category 1 events develops.

Note 2: All sanctioned competitions will strictly follow the class definitions and safety standards contained within Section 7.

Note 3: To be modified, Section 7 and Annexes require a 2/3 majority approval by the CIVL Plenary. Other documents may not require CIVL Plenary approval to be modified. If they do, a simple majority is needed.

1.2. Conjunction

Section 7 is to be used in conjunction with the FAI General Section (GS) of the Sporting Code. In the event of ambiguity, the General Section takes precedence.

1.3. *General Section*

The following subjects are detailed in the General Section.

FAI authority - responsibilities	(Chapter 1)
Definitions	(Chapter 2)
Sporting Licences	(Chapter 3)
Sporting Events	(Chapter 4)
Control of sporting events	(Chapter 5)
Complaints, penalties, protests and appeals	(Chapter 6)
International Records	(Chapter 7)
Measurements, calculations and margins	(Chapter 8)

1.4. *General Requirements for Hang Gliders and Paragliders*

1.4.1. Definitions of Hang Gliders

A glider capable of being carried, foot launched and landed solely by the use of the pilot's legs. The words "hang glider" cover all classes. These definitions take precedence over those given in the General Section.

Hang glider classes:

Class 1

Hang gliders having a rigid primary structure with pilot weight-shift as the sole method of control, and which are able to demonstrate consistent ability to safely take-off and land in nil-wind conditions. Subsidiary controls affecting trim and/or drag are permitted, but only if they operate symmetrically. No pilot fairings are permitted. No pilot surrounding structures are permitted, apart from a harness and control frame.

Sport Class: a sub-class of Class 1.

All gliders must meet the Class 1 definition above and in addition:

- They must be production models of hang gliders for which a certificate of airworthiness for type is in issue from either the HGMA, BHPA or DHV.
- Must be currently available for sale to the general public or have previously been available for sale for a minimum period of one year.
- Must be constructed of original parts only, except for retro-fitted streamlined uprights and base tubes supplied by the manufacturer.
- Must have a king post which is an essential part of the design and which supports the majority of the wing load when the wing is not flying.

Class 2:

Hang gliders having a rigid primary structure with movable aerodynamic surfaces as the primary method of control, and which are able to demonstrate consistent ability to safely take-off and land in nil-wind conditions solely by the use of the pilot's legs.

Class 3

Hang gliders having no rigid primary structure (paragliders), and which are able to demonstrate consistent ability to safely take-off and land in nil-wind conditions.

Sub-classes are

- Open – All paragliders
- Serial – Any EN/LTF
- Sport – Upto EN C/LTF 2
- Standard – Up to EN B/LTF 1-2

Organisers shall use these references when staging dedicated events.

Class 4

Hang gliders that are unable to demonstrate consistent ability to safely take-off and/or land in nil-wind conditions, but otherwise are capable of being launched and landed solely by the use of the pilot's legs.

Class 5

Hang gliders having a rigid primary structure with movable aerodynamic surfaces as the primary method of control in the roll axis and which are able to demonstrate consistent ability to safely take-off and land in nil-wind conditions solely by the use of the pilot's legs. No pilot fairings are permitted. No pilot surrounding structures are permitted, apart from a harness and control frame.

Note 1: For Class determination see Chapter 17.

1.4.2. Wheels and other Launch Aids

A hang glider flight shall start by foot launch from a hill or by means of mechanical equipment (aerotow, winch launch, etc.) except that:

- For competitions where launching is by tow, wheels, including those which are dropped immediately after take-off, may be permitted by the organisers provided it can be demonstrated that the hang glider complies with 1.4.1.
- Wheels or similar aids to take-off and landing are permitted for permanently disabled pilots, provided that non-disabled pilots can fly the glider without them.
- Class 2 hang gliders fitted with an electrical auxiliary motor may be permitted by the organisers of **First and** Second Category events, provided it shall be used solely for launching the hang glider, in order to reach the height and vicinity that an aerotow aircraft would typically release the pilot. Pilots must carry equipment that accurately verifies on the tracklog any usage of the motor.

Class 2 gliders are allowed to launch from a slope by using one of the following options:

- Launching on wheels integral to the design and being propelled by the pilot's legs or by an official pusher.
- Launching on a temporary wheel system known as a 'dolly' or 'launch cart' which remains on the ground after an official pusher accelerates the glider to flying speed.

1.4.3. Multiplace Gliders

In 1st Category events gliders may only carry one person.

1.4.4. Competition Flight Definitions

1.4.4.1. XC Competition

Definitions are set out in S7A Chapter 5

1.4.4.2. Accuracy Competition

Definitions are set out in S7C

1.4.4.3. Aerobatics Competition

Definitions are set out in S7B

1.4.5. Task, Round, Run

Cross Country pilots fly "tasks", Accuracy pilots fly "rounds", Aerobatic pilots fly "runs". Throughout this document the word "task" may be used for "rounds" and "runs".

2. ORGANISING 1ST CATEGORY EVENTS

2.1. World and Continental Championships

First Category events are World Championships, Continental Championships and World Air Games. The purpose of the Championships is to provide safe, fair and satisfying contest flying in order to determine the World, Continental or World Air Games Champions, individuals and teams, and to reinforce friendship among pilots of all nations.

2.2. General Rules

The general rules for First Category events are contained in the General Section and Section 7 Sporting Codes. Local Regulations are rules for a particular event and may not conflict with Section 7. See Chapter 6.1 for more information.

2.2.1. Multiple Class Events

If a championship is held with more than one class, each class shall be regarded as a championship in its own right. Minimum representation rules (below) apply for validity of each event.

World and European Championships may comprise hang-gliders in each of Class 1, Class 5 and Class 1 Women combined. In the event that an organiser submits a bid for a combined championship including any combination of Class 1, Class 5 and Class 1 women, such a combined competition may be held in the odd numbered year.

2.2.2. Categories

First and Second Category events may take part in the following categories: Individual, Team Overall, Men, Women, Junior.

Junior categories are called Junior U-XX (for Under XX-year of age). The age is determined by the calendar year in which the pilot has his birthday. If the category is Junior-26, a pilot being 26 or younger can still compete for the Junior class.

The categories are

- XC: Junior U-26.
- Accuracy: Junior U-26.
- Aerobatic: Junior U-23.

2.3. Practical Guidelines for Championship Organisers

CIVL has produced a multi-part document called Practical Guidelines for Organising CIVL/FAI Category 1 Championships, which is available for downloading, with other useful documents, from the CIVL website at <https://www.fai.org/civil-documents>, under Event Organisers. This should be consulted as part of the competition preparations. Use also Section 7 Guidelines and Templates. Other useful documents can be found at <https://www.fai.org/page/civil-organising-events> and <http://www.fai.org/fai-documents>, under Organising an Event. The FAI document, Guidelines in the Event of a Casualty or Serious Accident at FAI Air Sport Events, is issued directly by FAI to organisers of 1st Category events.

2.4. Bid Preparation & Procedures

2.4.1. Eligibility to Bid

To be eligible, the NAC making the bid shall, as a minimum, have held a national championship or FAI Category 2 competition with a minimum entry of 50 pilots for Cross Country events or 30 pilots for Accuracy and Aerobatics events, on the proposed site(s) within the four years before the bid is received.

2.4.2. Preliminary Bids

It is recommended that a preliminary bid is received by CIVL three years before the proposed event but receipt of a preliminary bid will not preclude other NACs from submitting a full bid in accordance with 2.4.3.

2.4.3. Detailed Bids

The detailed bid shall be submitted to the CIVL President by December 1st prior to the CIVL Plenary at which it will be presented, which should be two years before the proposed event. Even in the case of previously 'un-awarded' championships, there must be at least a year between the bid and the event. Bid documents will normally be published as part of the Plenary Agenda, giving time for delegates to study the bid prior to its presentation. Full details of the bid documents and deadlines can be found on the CIVL website at <http://www.fai.org/civil-events/organising-events>.

2.4.3.1. Airspace Confirmation

Where airspace restrictions would limit competition flying and the bid organisers anticipate relaxation of these restrictions for the first category event, a letter from the relevant Civil Aviation Authority confirming this must be submitted with the bid.

2.4.4. Screening of Bids

All bids for Category 1 events must be assessed by the appropriate Committee with regards not only to safety, but to all aspects including the experience of the organising team and financial constraints. The Committee will give the organisers the opportunity to revise bid documents if necessary, prior to the final Plenary Agenda deadline. The Committee will give its recommendations on bids reviewed to the Plenary.

2.4.5. Test Event

The Competition Organiser must arrange a test event on the proposed site one year before the Category 1 event and as close to the proposed Championship dates as is practical. CIVL shall appoint a Steward to attend the test event to provide advice to the organiser and to report on any organisational or site modifications required.

Unless authorised by the Plenary or the Bureau, when the test event cannot take place for any reason the Category 1 event shall be cancelled.

Competition Organisers of all test events are to apply for Category 2 status for these events. **Test events are sanctioned as Second Category events and published on FAI calendar and civilcomps.org as soon as the championships bids are approved by the plenaries.**

2.5. General Event Organisation

2.5.1. National Entry

Pilots represent their NAC and must be entered with their NAC approval. A pilot unable to represent a NAC may be authorised to participate by the FAI and/or the CIVL Bureau. Such pilots are defined as FAI Participants. See General Section 3.1.3.5 and 4.5.1.

All entry applications must be made through the official website. All information required on the application form must be provided. Applications not validated by the NAC or its official representative will be disregarded.

After the start of the first task no change of pilot may be made.

2.5.2. Individual Entry

The number of pilots entered by a NAC may be higher than the number of pilots constituting a national team. Pilots that are not eligible to score for the national team are eligible to compete for the individual championship.

The composition of the national team must be declared to the Meet Director at the latest before the pilots' briefing on the first championship task.

Current World and Continental Champions, male and female, and for paragliding XC competitions the top 5 women in the WPRS ranking, shall be allowed a discretionary entry to defend their title if not selected as part of the national entry, providing they have NAC approval. But they shall not score for their national team.

When an allocation procedure is in place to qualify pilots, the request to use such discretionary entry must be made before the start of the first allocation round.

No member of a NAC's organising team may also be a competitor in the championship.

2.5.3. Guest Pilots

In Continental Championships, if any places remain available at a date to be specified in the Local Regulations, entries from suitable pilots from other continental regions may be accepted by the organisers. Such pilots will have to fit the general qualification criteria of the competition and will be selected in their WPRS order with one female pilot accepted for every 4 men that are selected. If non-Continental pilots are accepted, they will be treated as Continental pilots, but will be filtered out of the final results and there will be two sets of results published: an 'Open' list and a 'Continental' list for championships' purpose.

2.5.4. Sporting Licence

In First Category events, each competitor shall hold a valid FAI Sporting Licence issued by the NAC the pilot is representing or by FAI.

FAI Sporting Licences must be registered online. Only online Sporting Licences are valid.

FAI Sporting Licences will be checked online before the start of the competition by the CIVL Jury President. They must cover the total duration of the competition.

It is each NAC's responsibility to select only pilots with valid Sporting Licences.

It is each pilot's responsibility to make sure a valid Sporting Licence is held.

2.5.5. Minimum Representation

For World Championships a minimum of 4 countries with a total of 8 competitors available to fly during the Championship is required for the title of Champion to be awarded; for Continental Championships, a minimum of 3 countries with a total of 8 competitors is required.

2.5.6. Duration of Championships

The total period of the Championships shall not exceed 14 days including the opening and the closing ceremony. Provision must be made within this period for competitors to complete all mandatory elements of the Championships. Competitors are subject to all rules relating to championship flying throughout this period, whether flying a task or not.

The opening and closing ceremonies are considered to be the official start and end of the championship.

To help standardise competition schedules, it is recommended that cross-country opening ceremonies are scheduled on a Saturday and closing ceremonies on a Saturday (13 days later).

In test events, it is recommended that opening ceremonies are scheduled on a Sunday and closing ceremonies on a Saturday (6 days later).

2.5.7. Extension of Flying

In the event of continued bad weather, a task may be set on the day reserved for the prize-giving, in order to validate the Championship, but the total Championship period may not be extended.

2.5.8. Official Practice Period

A practice period of not less than two days immediately preceding the opening of the championship shall be made available to all competitors.

2.5.9. Official Practice Task

A task shall be set, flown and scored under competition conditions except that the scores shall not be counted in the Championship.

Unless specified in the Local Regulations, this task must take place after the mandatory safety briefing (see Chapter 9) and before the first scored competition task.

All competition staff must be present for this task as the aim is to fully test all aspects of the organisation as well as familiarise pilots with competition procedures.

If the task is cancelled due to bad weather, it is allowed not to have a practice task.

2.5.10. Task Validity

To count as a Championship task/round all competitors shall have been given the opportunity of having at least one competition flight in time to carry out the task/score for the round.

2.5.11. Competition Validity

2.5.11.1. Cross Country Competition

At least 1500 points must have been available or awarded. See Section 7A-5

2.5.11.2. Accuracy Competition

At least 3 complete rounds must have been flown. See Section 7C-5.

2.5.11.3. Aerobatics Competition

At least 2 runs must have been flown. See Section 7B-5.

2.5.12. Title of World or Continental Champion.

2.5.12.1. Cross Country Competition

The Individual and Team winners are the pilot or team with the highest score at the end of the competition. See Section 7A-5.

2.5.12.2. Accuracy Competition

The Individual and Team winners are the pilot or team with the lowest score at the end of the competition. See Section 7C-5.

2.5.12.3. Aerobatics Competition

The Individual and Team winners are the pilot or team with the highest score at the end of the competition. See Section 7B-5.

2.5.13. Medals and Diplomas

Gold, Silver and Bronze medals shall be awarded to:

- Pilots placed first, second and third (full size medals).
- National team leaders placed first, second and third (full size medals).
- National team members placed first, second and third up to a maximum (small medals).

Diplomas shall be awarded to pilots placed first to tenth.

When a valid Women's Championship is run, and medals are awarded to women, diplomas are also awarded to women placed first to tenth.

The organiser is responsible for transportation and any customs costs.

The competition organiser may award further trophies and/or prizes.

2.5.14. Opening Ceremony

If the Ceremony is to be conducted in a large sports hall, hangar, or town hall, for example, a suitable PA system must be available. If the Ceremony is to be held outside, a suitable PA system must be available, and an alternative indoor venue should be planned in case of bad weather.

The dignity of the ceremony must be kept in mind. Athletes must be properly dressed and refrain from carrying sponsor material and other paraphernalia.

The key organisers and CIVL officials should be introduced.

Speeches should be maximum five minutes in length and must be translated if not in English.

The highest FAI representative (usually the Jury President) should be given the opportunity to speak and to officially open the Championships. The official opening statement can be made in conjunction with a local VIP.

The FAI flag should be raised and the FAI anthem played.

The Ceremony may be preceded or followed by a Parade or photo opportunity where the National Teams can be seen with their national flags.

2.5.15. Award-Giving and Closing Ceremony

To ensure consistency at all FAI 1st Category event ceremonies, and guarantee that minimum standards of dignity and protocol are adhered to, a standard format for Awards and Closing Ceremonies has been agreed.

See FAI document “Protocol for Award-Giving and Closing Ceremonies at FAI Championships”.

2.5.16. Event Management System

Full use of the CIVL Event Management System is recommended, but not mandatory. In First Category events and test events, it is mandatory to use the CIVL Event Management System for registration, allocation, publication of all documents and results. CIVL reserves the right to require and/or use other EMS functionalities, including media-orientated features. For all events: It is mandatory for all first time Second Category event pilots to register in civlcomps.org so they can get a CIVL ID.

Pilots must take extra care to fill all information correctly. Pilots who have not registered correctly in civlcomps.org will not be processed in the ranking of the event. Organisers must make sure that the CIVL IDs are correct at registration time and when sending the results.

2.6. *World Air Games*

The General Rules for World Air Games largely follow the General Section and relevant subsections of the Sporting Code, but may be adapted to suit the logistics of the event. In case of conflict, the WAG General Rules will take precedence.

3. SANCTION FEES

See Section 7 K for the amount of fees, method, timing and the payment procedure

4. RESPONSIBILITIES OF ORGANISERS & TEAM LEADERS

4.1. Detailed Guidelines

More detailed information on roles and responsibilities can be found in the document: Practical Guidelines for Organising CIVL/FAI Category 1 Championships, which is available for downloading, with other useful documents, from the CIVL website at <http://www.fai.org/civl-documents>, under Event Organisers, and on FAI website at <http://www.fai.org/events/fai-organising-events>. This should be consulted as part of the competition preparations.

Use also Section 7 Guidelines and Templates.

4.2. The Competition Organiser

After the Test Event the Competition Organiser must institute the changes requested by the Steward unless the Competition Organiser presents a written document explaining why these changes are undesirable.

The Competition Organiser must implement any safety recommendations of the CIVL Officers.

If the Competition Organiser does not implement the requirements, the Jury President may suspend the competition until such a time that the requirements are satisfied.

4.3. The Meet Director

The NAC Organising the Championships shall appoint a Meet Director acceptable to CIVL not less than six months before the event. The CIVL Bureau must approve any change of Meet Director. The Meet Director shall take overall operational responsibility for the event including the programme of tasks to be flown. The Meet Director is also responsible for:

- Publishing a final entry list by the start of briefing on the first flying day.
- Issuing the daily results with minimum delay.
- Reporting the full results, including details of protests or serious problems encountered, to the NAC with copies to FAI and CIVL.

4.3.1. Task Advisory Committee – XC Competition

This shall be a small committee, which will include at least two pilots elected at the first Team Leader's meeting and one FAI Steward. Task setting and selection remains the ultimate responsibility of the Meet Director, but a task will not be flown without prior reference to the Task Advisory Committee. The Meet Director may replace a Task Committee member after consultation with the other committee members. This may be deemed necessary when a committee member is too late or otherwise not present.

4.4. The Safety Director

The Competition Organiser shall appoint a Safety Director acceptable to the CIVL Bureau whose main responsibility is safety not less than six months before the event. The CIVL Bureau must approve any change of Safety Director. A review of the suitability of the Safety Director should be made by the Steward after the practice event and the bureau may require a replacement Safety Director. The Safety Director must be fluent in both English and the local language. A permanent safety channel and separate telephone numbers must also be allocated. The Safety Director must have knowledge and experience of the site being flown and ideally must have experience in appropriate competitions.

4.4.1. Safety Director Responsibilities

The Safety Director is responsible for monitoring all aspects of safety. These matters include but are not limited to: wind speed, the presence of thunderstorms and other potentially dangerous meteorological conditions. Further duties are: to monitor in-air crowding at take-off; the presence of dangerous air traffic; and preventing pilots launching with unsafe equipment. The Safety Director has a duty to give a mandatory safety briefing to all pilots prior to the commencement of championship flying.

The Safety Director should attend Safety Committee meetings and accept input from the Safety Committee.

In cross-country, further responsibilities include: attending Task Advisory Committee meetings: monitoring the setting of goals and routes and checking that all pilots have reported back.

In Accuracy, responsibilities include checking especially wind speed at launch and target, and pilot separation.

The Safety Director should collect incident reports and discuss the incidents with the Steward, present the conclusions at the next pilot briefing and shall submit a consolidated and detailed report to CIVL within a month of the end of the competition.

The Safety Director may stop a task or suspend launch at any point for reasons of safety. Such decisions shall be reported to the Jury President.

4.4.2. Safety Committee

4.4.2.1. XC Competition

A Safety Committee must be formed and shall include a minimum of three pilots elected by the Team Leaders at the first team leaders briefing. The Safety Committee shall be responsible for evaluating all tasks and advising the Meet Director as to the safety of each proposed task prior to task briefing.

Safety Committee should only include pilots with experience appropriate to the flying site and conditions and should not be made up only of pilots expected to achieve high ranking in the competition, but should include pilots of different rankings.

Every Safety Committee pilot must be on radio.

The Meet Director may replace a Safety Committee member after consultation with the other committee members. This may be deemed necessary when a committee member is late or otherwise not present.

The Meet Director and the Safety Director have the responsibility for determining safe or unsafe flying conditions, while the Safety Committee serves as a check and balance for safety considerations.

The ultimate responsibility for a pilot's safety lies with the pilot and is not guaranteed by the actions or decisions of the Meet Director or the Safety Committee. All pilots have a duty to monitor the flying operations and report to the Meet Director when conditions become unsafe either on launch or on course.

This should be done using the phrases Level-1 (safe), Level-2 (strong) or Level-3 (Too strong), to avoid confusion.

No person may be a member of both the Safety Committee and the Task Advisory Committee.

4.4.2.2. Accuracy Competition

A Safety Committee must be formed. The Safety Committee's duty is to monitor the flying operations and report to the Meet Director when conditions become unsafe either on launch, on course or on the target. The Safety Committee should include: Meet Director or deputy, Launch Marshal or deputy, a senior member of the judging team and a minimum of two experienced participating pilots, no more than one of whom may be from the host nation.

4.4.2.3. Aerobatics Competition

A Safety Committee must be formed and shall include three pilots elected by the pilots during the General Briefing from proposals put forward by the Meet Director.

4.5. Meet Officials

No person may serve as a meet official (including but not limited to Meet Director, Safety Director, organisers, etc.) and a national team member (i.e. pilot, team leader) during the same competition, simultaneously or sequentially, beginning with the first mandatory pilot safety briefing.

The intent of this rule is to prevent individuals in a position to affect scoring or results from taking part in both the organisation and the competition itself.

4.6. Team Leader Responsibilities

4.6.1. Liaison

Each team must have a Team Leader. A competing pilot can be a Team Leader. Nations with few pilots can be represented by the same Team Leader.

The Team Leader may be a competitor or crew but preferably should be additional to them.

If a national team has pilots flying from more than one site, the Team Leader may nominate a deputy for such sites.

The Team Leader is the liaison between the organisers and the team and is responsible for the proper conduct of team members, for ensuring that they do not fly if ill or if suffering from any disability which might endanger others and that they understand the rules.

4.6.2. Authority

The team leader has the authority to remove any member of the team from an event.

4.6.3. Accidents

Each team leader is responsible for submitting a report to the Safety Director for any accident involving a team member. This shall be submitted prior to the team leaders' meeting on the day following an accident.

5. PREPARATION& REGISTRATION

5.1. Programme and Facilities

5.1.1. Provision of information

The organisers shall provide all facilities necessary for the satisfactory operation of the championships and publish the following information, as appropriate, as far in advance as possible:

- Programme of the championships with dates and times
- Names of the Meet Director, key officials and stewards
- General operational information, including meteorological, medical and safety arrangements, repair facilities and communication information
- Meteorological facilities including daily forecasts with synoptic charts, and satellite presentation
- Information on likely tasks
- Airspace restrictions and any hazardous considerations
- Accommodation and food arrangements, including facilities for press and visitors
- Plans of airfields or sites to be used, showing flying layout and location of entrances and administrative and domestic buildings, car and trailer parks
- Full list of documents and equipment to be provided by competitors
- A provisional entry list on request
- Details of extra language or interpreting facilities
- Pilot entry qualifications, fees and deadlines

5.1.2. Entry fee package

As a minimum the following should be included in the fee, when appropriate:

- One map or chart of an adequate scale which must clearly indicate all take offs, landing turn points, restricted airspace and restricted areas. The chart must have a clearly visible grid that matches the GPS co-ordinates used for the competition
- Contest numbers, identity badges and all competition papers

For the minimum possible additional fee to pilots, organisers shall provide:

- Transport of gliders and pilots to and from the take-off site
- Retrieval from out landings along stated routes
- (Optionally) packed lunches or restaurant coupons on each flying day.

5.1.2.1. Accuracy Competition Transport

Transport of gliders and pilots between HQ or pre-determined pick-up point and the take-off site on each flying day should be included in the fee.

5.1.3. Website

The organiser shall provide a competition website at least 6 months before the championship starting date. It shall give the information listed above and details of entry requirements, deadlines and procedures for the championship. Once approved, a copy of the Local Regulations should be available for download from the site and a link provided to that document on the FAI/CIVL website. If Local Regulations are posted to the site prior to being approved by CIVL then they should be clearly marked "NOT YET APPROVED BY CIVL".

5.1.4. Headquarters

The competition headquarters, all pilot information, maps and any GPS uploads must be prepared before registration is scheduled to commence.

5.2. Registration and Scrutineering

5.2.1. Reporting

On arrival at the championships site each Team Leader and team members shall report to the Registration Office to complete their entry forms, have their documents checked and to receive any supplementary regulations and information.

5.2.2. Ceremonies

The programme for the opening ceremony shall be given in writing to team leaders on arrival. The programme for the closing ceremony and prize giving shall also be published, in writing, at least four days in advance of the ceremony.

5.2.3. Insurance

Documentary proof of insurance as specified by the Competition Organiser on the entry form or in the Local Regulations shall be made available to the organisers before starting to fly from the competition site.

5.2.4. Contest Numbers

The Competition Organiser may allocate numbers or letters to each competing glider. Helmet stickers may also be required. Their placement will be specified in the Local Regulations. Failure to display numbers as required is a technical offence and may be penalised accordingly. It is not allowed to have a second number on the glider in addition to the official competition number.

 Hang Gliding: To improve visibility and make glider identification easier, all competitor gliders must either display two organiser-provided patches of contrasting material with competition numbers on their leading edges or a high contrast graphics or a high contrast nose cone.

5.2.5. Glider acceptance check.

All gliders must be made available to the Competition Organiser during the period of registration, for an acceptance check, in the configuration in which they will be flown. After the opening of the launch window on the first scheduled competition day or the first competition flight of the first round on the first scheduled day no change of pilot or glider may be made except as specified under the conditions Damage to a competing glider (see relevant subsections).

6. LOCAL REGULATIONS

6.1. Local Regulations and Hierarchy

These are the rules for a specific event prepared by the Competition Organiser to supply additional information and rules to team leaders and pilots. They are to be used in conjunction and must not conflict with the General Section and Section 7 of the FAI Sporting Code. They should also cover those areas where Section 7 or the General Section give discretion or a choice in the rule. The hierarchy of rules is that Section 7 takes precedence over the Local Regulations and the General Section takes precedence over Section 7.

6.2. Format and Template

Local Regulations for a Category 1 Championship and the Test Event prior to the Category 1 Championship, must use the order and format provided in Section 7 Guidelines and Templates, so that team leaders and pilots become familiar with a consistent layout and order of content.

6.3. Approval and Publication

The Local Regulations shall be approved by CIVL Bureau and not subsequently changed, except under the conditions stated below. In the approval process for the Local Regulations, CIVL Bureau should involve the appropriate committee and the steward who will be working at the event.

Local Regulations should be submitted to CIVL Bureau 8 months prior to the event and approved and published at least 6 months prior.

Once approved, the Local Regulations will be published on the CIVL website and CIVL Delegates will be notified. The Competition Organiser should, as a minimum, publish on the website a link to the approved Local Regulations. Any version of the Local Regulations published by the Competition Organiser before approval by CIVL Bureau must display a clear and prominent statement to that effect.

6.4. Entry Requirements and Local Regulations

The entry requirements form a part of the Local Regulations and may be approved and published earlier than the final Local Regulations in order to give pilots and NACs maximum time to prepare. The same approval procedure should be followed prior to publication of entry requirements.

The Competition Organiser may additionally send this documentation direct to FAI member associations.

The organiser may also supply competitors with supplementary information on arrival at the championship site but the CIVL Bureau must have approved any matter intended to have the force of a competition rule as a minimum.

6.4.1. Changes to Local Regulations

The Competition Organiser shall make any changes to Local Regulations which are necessary to comply with rule changes published in the Sporting Code between the date of approval (by CIVL) of those regulations and the start of the Championship.

Any further additions or amendments to the published Local Regulations shall be announced by the Meet Director after discussion with the Steward and Team Leaders and approval by the Jury. Such changes might include, for example, adjustments to task parameters, policy on rest day, programme timings etc. If changes are made after the event has started, they shall not be applied retrospectively.

For necessary changes to S7 rules (for safety reasons, for example), or to the Local Regulations that put them in conflict with S7 rules, agreement of the Meet Director, Jury and 2/3 of the Team Leaders present at the meeting, is required.

7. OPERATIONAL ASPECTS

7.1. *Communications*

Communication between the organisers and competitors is achieved through web/mobile applications (such as Telegram, WhatsApp, email...), Team Leaders' meetings and pilots' briefings.

The organiser will set up a group on a messaging platform such as Telegram and ensure that all pilots and team leaders are in the group. All official information about required meeting or events transportation to launch, availability of results, day cancellations, etc. will be done via this group. The organiser must choose a messaging platform (Telegram is suggested but not required) that all competitors are able to use free of charge. The group must be established one week prior to the start of the event and used for messages about transportation and practice days.

7.2. *Meetings/Briefings*

The Meet Director shall hold a briefing for competitors before each task, at which full meteorological and operational information concerning the task shall be given. Task, weather, airspace information, and any special requirements shall be in writing. If possible, a meteorologist prepared to answer questions from pilots shall give weather briefings. Flight safety requirements given at briefing shall carry the status of regulations. Briefings may be postponed from the set time in the event of bad weather and further briefings be given if necessary. All briefings must be conducted in English. This also applies to Accuracy and Aerobatic (read "round" or "run" iso "task")

In Aerobatics, all pilots must attend the morning briefing.

In Accuracy, pilots may attend the Team Leaders morning briefing.

A Team Leaders meeting is held at the Meet Director's initiative. It shall also be held within 18 hours if five or more Team Leaders request it.

7.2.1. First Team Leaders Meeting

The Meet Director shall hold a Team Leaders' Meeting before the start of the first task/round/run of the competition. Typically, this meeting is held after the Mandatory Safety Briefing. Logistical, operational and safety aspects may be emphasised encouraging Team Leaders to ensure their pilots understand, especially those with limited English and/or new to Category 1 competitions. Any issues arising from the Mandatory Safety Briefing can also be addressed or finalised.

7.3. *Operational Regulations*

7.3.1. Compliance with the law.

Each competitor is required to conform to the laws of the country in which the Championship is held. This includes rules of the air

7.3.2. Unsporting Behaviour

Unsporting behaviour should be dealt with according to Section 7 Guidelines and Templates, Chapter 6, and General Section 5.2.

7.3.3. Airworthiness.

Each glider shall be flown within the limitations of its certificate of airworthiness or permit to fly and its manufacturer's published limitations. See relevant subsections.

7.3.4. Damage to a Competing Glider

See relevant subsections.

7.3.5. Scoring, Penalties, Complaints, Protests

See relevant subsections.

7.3.6. Measurement of Distance

All distance measurements in Local Regulations and task briefings for Category 1 events shall be given in metric units.

7.3.7. Pre-flyers

Experienced pre-flyers must be available. Further details are in Chapter 8.

7.3.8. Test Flying

No competitor may take-off during a competition day from the competition site without the permission of the Meet Director. This may be given for test flying.

7.3.8.1. Accuracy Competition Test Flying

When test flying, pilots must not attempt to make a target approach. The Meet Director may also allow competition pilots to fly to the landing field when the competition has been stood down but pilots should not attempt a target approach.

7.3.9. External Aid to Competitors

As far as possible, the contest shall be between individual competitors, neither helped nor controlled by external aids.

In Cross-country events, any help in navigation or thermal location by any non-competing aircraft, including competing gliders not in the act of carrying out the task is prohibited. Pre-fliers must land or fly in a designated area as soon as possible after task flying has started (see Chapter 8, Pre-flyers).

In Accuracy, coaching pilots to the target by radio or other external aid is forbidden.

8. PRE-FLYERS (WIND DUMMIES) & OTHER FLYERS

8.1. Objective

The object of pre-flyers is to assist the Meet Director in deciding when to start take-offs, and to provide information to competitors about the thermal prospects.

8.2. Timing of Flights

To give the Meet Director the information required, the pre-flyers must fly when and where directed, even if this results in their landing out.

8.3. Limit of Flights

When competition flying begins, the pre-flyers have done their job and must land or fly in a designated area as soon as possible so that they do not interfere with competition flying; in any event they may not fly beyond the start gate.

8.4. Status and Expertise

Pre-flyers must be a part of the organisation and receive similar benefits as other helpers. They must not be members of teams.

Pre-flyers should be pilots of equivalent skill to the competitors. It should be an honour to be chosen as a wind dummy and good ones are valuable at assisting in task decisions.

The status of pre-flyers and their important role in Championships should be recognised.

8.5. Other Flyers

8.5.1. Free Flyers

Free flyers and personnel associated with teams must not be permitted to fly the tasks or sections of it; it is particularly important that they do not approach goal fields.

8.5.2. Media

For each task, the Meet Director, after consultation with the Steward, will determine the press flying activity for the day. On days when media flying is to take place the Meet Director is to brief Team Leaders and FAI Officials in advance. It is mandatory for GPS to be carried by all press aircraft and for the pilot to maintain radio communication with the Safety Director; press aircraft are to fly down and land immediately if communications are lost.

8.5.3. Air Marshals

Where air marshals are appointed for a Championship they must fulfil the same eligibility criteria as are required of pilots.

8.6. *Meet and Safety Directors*

Neither the Meet Director nor the Safety Director shall fly while a task is in progress; end of a task is defined as when all competing pilots have reported back. This does not exclude either official from flying in a helicopter or other such aircraft to aid in a search.

9. FLIGHT SAFETY

9.1.1. Safety Briefing

It is mandatory for all pilots to attend the mandatory Safety briefing (4.4.1) prior to the commencement of flying; pilots who fail to do so will not be allowed to compete.

9.1.2. Dangerous Flying Conduct

It is the responsibility of every pilot to fly in such a way that personal safety and the safety of others is maintained at all times. The Meet Director may penalise competitors who fail to observe this rule, or exclude them from the results.

9.1.3. All Flying Banned

Both the Meet Director and the Safety Director have the power to ban flying from the site if a task or day is cancelled due to dangerous conditions.

9.1.4. Pilot Competence

Both the Meet Director and the Safety Director have the power to exclude from the Championship pilots who demonstrate a lack of the necessary skills for safe launching, flight or landing. The steward will be consulted before such decision is taken.

9.1.5. Fitness

A pilot must be fit to fly. Any injury, drugs or medication that might affect the pilot's performance in the air must be reported to the Director before flying.

9.1.6. Drugs

Performance enhancing drugs are prohibited. Refer to General Section 3.11.2. See also <http://www.fai.org/cimp-anti-doping-programme>

9.1.7. Pilot Equipment

Detailed rules on standards for helmets, reserve parachutes, glider conformance and other equipment are provided in the relevant subsections.

The purpose of these standards is to ensure a certain minimum level of structural integrity and pilot safety in all classes of hang gliders and paragliders and associated equipment.

CIVL recognises that some pilots will choose to trade performance, cost, comfort, convenience, etc. over safety in their choice of personal safety equipment. The results of accidents and injuries affect not just the pilots that may injure themselves due to lack of protection, but friends and family, and the sport as a whole. History shows us that injuries could have been prevented with simple means of better personal protection. E.g. crushable foam in helmets. CIVL also recognises the fact that pilots are personally responsible for their own and others' safety at all times, both in competition and free flying. No rules or equipment can prevent accidents when human factors are involved in decision making. However certain safety equipment can in some cases prevent severe injuries without incurring major negative factors for pilots. E.g. parachutes. CIVL will therefore mandate the use of some personal safety equipment, and will set minimum standards of that equipment where needed.

9.1.8. Pre-flight Check

Each glider shall be given a pre-flight check by its pilot, and may not be flown unless it is serviceable. Pilots shall ensure that they have a proper hang check, leg loop check and/or no twists in the risers/lines, immediately prior to launch.

9.1.9. Maximum Wind Speed

The organiser shall include in the Local Regulations a reasonable maximum wind speed in which a task may be flown.

9.1.10. Emergency Medical Provisions

In Cross-country, an English speaking emergency doctor or medical technician with proper equipment must be available at take-off and at a strategic location during the task. A helicopter with rescue equipment must be available. The normal expected response time shall be announced in the bid and stated in the Local Regulations.

In Accuracy and Aerobatics, an English speaking emergency doctor or medical technician with proper equipment must be available at take-off and at the target. Local Regulations will state response time for evacuation by ambulance to hospital or specialist medical centre. Helicopter evacuation is not mandatory, but if available, the Local Regulations will state the response times.

9.1.11. Action in the Event of a Casualty or Serious Accident

The Competition Organiser and Meet Director shall be knowledgeable of and consider following all the procedures outlined in the FAI document 'Guidelines in the Event of a Casualty or Serious Accident at FAI Airports Events' which is sent to all Category 1 Competition Organisers by the FAI office.

10. GENERAL SAFETY MEETING

A safety meeting attended by all pilots is required. Only by presenting the safety matters relating to the specific site and conditions can there be reasonable assurance that all pilots will have access to the important local safety information. It is mandatory for all pilots to attend such a meeting. Items that should/could be covered in a safety meeting are outlined in Section 7 Guidelines and Templates.

11. STEWARDS AND JURY

11.1.1. Powers and description

These are detailed in the General Section.

11.1.2. Appointment of Stewards.

Unless specifically authorised by the CIVL Bureau, CIVL shall appoint one steward in consultation with the event organiser.

11.1.3. International Jury

CIVL shall appoint an international jury of three different nationalities. No member of the jury may belong to the host country unless specifically authorised by the CIVL Bureau.

11.1.4. Authority of Stewards

On the steward role, power and responsibilities, see the CIVL Steward Handbook.

The steward cannot override the decisions of the Meet or Event Director, but the steward should point out that his/her actions may fail under a protest.

11.1.5. Authority to Stop Event

The steward must report to the Jury President if rules are not being applied or if adequate safety measures are not in place. The Jury President can temporarily stop the event according to the rules of the General Section.

11.1.6. Funding of Jury and Stewards

11.1.6.1. By the Organiser

The Competition Organiser is responsible for travel, accommodation, meals and refreshments for the international jury and steward(s). At organiser discretion alcoholic beverages can be excluded from food expenses.

Travel shall be arranged after consultation and agreement with FAI officials. The minimum standards to be provided at the event are:

An individual room in the equivalent of 2 star hotel, with air conditioning, when available, should the temperatures be above 30°C.

Suitable dedicated transport for the Jury and Steward(s) must be provided. This transportation will consist of two vehicles in proper working order unless the Steward of the test event deems otherwise. This transport will be insured in full for accidental damage liability or the Organiser will indemnify the jury and stewards in respect of such costs.

The organiser is also responsible for these costs for the steward at the test competition and may be required to fund the cost of an extra visit by the steward, or another suitable person appointed by the Bureau. This additional visit will be authorised by the Bureau where it is necessary to confirm that matters, identified as essential after the test event, have been properly dealt with.

11.1.6.2. ByCIVL

CIVL is responsible for payment stipends to the steward and the jurors at 1st Category events. The amount of the stipend and payment conditions are described in Section 7 K.

11.1.6.3. Equipment

The Competition Organiser is responsible for providing:

- one radio compatible with competition frequencies to Jury and each steward;
- one cell 'phone compatible with the local system, when needed, to each juror and steward.

12. CIVL RECOGNISED 2ND CATEGORY EVENTS

12.1. General Rules

12.1.1. Conflict

The rules for Second Category events shall be based as far as appropriate on those for 1st Category events and must not conflict with them in principle. It is underlined that NACs are responsible for managing the sport in their own territories and have the local knowledge to do so. Therefore, NACs are best placed to make judgements on which rules are appropriate for their events. 2nd Category organisers should make their own decisions within this framework.

2nd Category events that are also test events for 1st Category events shall be based as far as possible on 1st Category event rules and sample Local Regulations except for the requirement for entry requirements and those for additional FAI officials. Organisers should be familiar with all aspects of Section 7. Test events are run to make sure that they are aware of the requirements applicable to a Category 1 championship and that they can cope with them.

12.1.2. Language

The rules, regulations and information circulated to NACs and competitors or issued during the event shall be in English and, at the discretion of the organisers, in the language of the host country. In all interpretations the English language version shall prevail.

12.1.3. FAI Authority

The Rules, Regulations, programme and all other official documents shall carry the statement of FAI authority and display the FAI logo.

12.1.4. Type of Event

Only competitions defined as International Sporting Events or Open National Championships (GS 3.1.3 & 4) and meeting the requirements below may be sanctioned as CIVL recognised 2nd category events. In order that international competitors will not be at a disadvantage compared with host nation pilots no 2nd Category competition may be run as a series with more than one rest day between planned flying days.

Multiple competitions for the same FAI Class in the same location with overlapping dates will not be accepted as 2nd Category events, except where the multiple competitions are different sub-classes PG(Open, Serial, Sport) or HG (Class 1, Sport) and the total number of pilots competing in all the sub-classes does not exceed 150 pilots.

12.1.5. Sporting Licence

In Second Category events, each competitor shall hold a valid FAI Sporting Licence.

FAI Sporting Licences must be registered online. Only online Sporting Licences are valid.

By signing the competition application form to obtain the Second Category Event status, the NAC agrees that it is their responsibility for making sure that all pilots have a valid Sporting Licence.

It is each pilot's responsibility to make sure a valid Sporting Licence is held.

At no point does CIVL control which pilots have valid Sporting Licences.

An NAC has the power to forbid pilots without valid Sporting Licences to take part in the competitions it has sanctioned.

12.1.6. World Pilot Ranking Scheme

Pilots participating in valid Category 2 events will earn WPRS points under the rules currently in force for that scheme. [See chapter 14 for WPRS rules](#)

12.2. Requirements

12.2.1. NAC Authority

Only events which have the approval of the NAC of the Competition Organiser may be sanctioned as Category 2. If the event is to be held in the territory of another NAC, then the Competition Organiser must also obtain authorisation from that NAC. Written proof of this authorisation must be submitted to FAI/CIVL with the application form.

If the event is to be held in a territory with no NAC, then the Competition Organiser must inform the competent administration of the territory (Minister of Sport, Civil Aviation...). Written proof of the information sent must be submitted to FAI/CIVL with the application form.

12.2.2. Application for Sanctioning

As per the General Section of the Sporting Code, in order to be sanctioned as Second Category Event, all required documentation and payment must be received by the FAI Head Office at least 30 days before the start of the event.

The competition organiser must provide to the CIVL Competition Coordinator the following documentation well before the 30-day deadline so it can be checked, eventually corrected and processed:

- the completed application form, along with
- the proof of payment of the sanction fee.

The sanction fee is paid directly to FAI (see 12.4), preferably at the same time that the application form and proof of payment are sent to the Competition Coordinator.

12.2.3. Reserve Dates

A Competition Organiser may specify several sets of dates as reserve dates for the competition. These may be used if the Competition Organiser postpones the competition prior to the event taking place, or if it was not possible to start any tasks during the event (i.e. no pilots launched under competition conditions). The Reserve Dates will be displayed on the FAI event calendar in addition to the primary Competition Dates. This is subject to the following conditions:

The Competition Organiser notifies the CIVL Competitions Coordinator as soon as the competition is postponed, and at the latest within 48hrs of the end date of the competition. (This is so the FAI calendar is updated to show that the Reserve Dates are now the actual Competition Dates)

Any pilot who is unable to attend the reserve rates is entitled to a refund of a minimum of 80% of any entry fee paid. The refund policy shall be stated in the entry regulations for the event.

12.2.4. Re-scheduling

If an event is cancelled and all the pilots are given the opportunity to get their money back, it may be re-scheduled provided that the minimum 30days notice is given. The time period is measured from the start of the competition.

12.3. International Participation

In order to be recognised as a Category 2 event a minimum of 25% of the maximum available places must be set aside for pilots from nations other than that of the Competition Organiser e.g. if the maximum number is 100, 25 of these places will be set aside for international competitors.

The registration deadline for foreign pilots shall be no sooner than:

- 15 days for events sanctioned between 30 and 60 days before the start of the competition.
- 30 days for events sanctioned between 61 and 90 days before the start of the competition.
- 45 days for events sanctioned between 91 and 120 days before the start of the competition.
- 60 days for events sanctioned 121 days or more before the start of the competition.

After that date unused places can be filled at the discretion of the Competition Organiser.

12.3.1. Test Events

2ndCategory events that are test events for 1stCategory events may include specific events for foreign pilots e.g. national championships. In this case, the organiser must set aside a minimum of 50% of the maximum available places to other foreign pilots, plus 5 wild cards at the disposal of the Organiser (e.g. if the maximum number is 100, 50 places are truly open to foreign pilots, 5 places are wild cards at the disposal of the Organiser, 45 places are at the disposal of the Organiser for national pilots for other National or Open championships).

The registration deadline for foreign pilots shall be no sooner than

- 15 days for events sanctioned between 30 and 60 days before the start of the competition.
- 30 days for events sanctioned between 61 and 90 days before the start of the competition.
- 45 days for events sanctioned between 91 and 120 days before the start of the competition.
- 60 days for events sanctioned 121 days or more before the start of the competition.

After that date, unused places can be filled at the discretion of the CompetitionOrganiser.

12.4. Sanction Fee

See Section 7 K for fees, the terms of payment and refund.

12.5. Validation

12.5.1. Minimum Numbers

12.5.1.1. XC Competition

The minimum number of competitors required to validate a 2nd Category event shall be no less than 2 pilots.

12.5.1.2. Accuracy Competition

The minimum number of competitors required to validate a 2nd Category event shall be no less than 8 pilots.

12.5.1.3. Aerobatic Competition

The minimum number of competitors required to validate a 2nd Category event shall be no less than 2 pilots.

12.5.2. Maximum Numbers

The maximum number of pilots must not exceed 150.

12.5.3. Tasks & Validation

All competitors shall be set the same tasks, from the same sites on the same days.

12.5.3.1. XC Competition

The minimum number of tasks required to validate a 2nd Category event is one scored task.

12.5.3.2. Accuracy Competition

The minimum number of rounds required to validate a 2nd Category event is one scored round.

12.5.3.3. Aerobatics Competition

The minimum number of runs required to validate a 2nd Category event is two scored runs.

12.6. Results

12.6.1. Deadline for Provision

Organisers of 2nd Category events must provide official results to the CIVL Competition Coordinator within 7 days of the end of the competition. If results have not been received by that date, CIVL will send a reminder to the organiser and the NAC concerned at the 7 day point. If no official results are received by the 14 day point, another reminder will be sent and any available unofficial results (obtained from a reliable source) will be added to the WPRS list. If the official results have still not been received by the 30 day point, the unofficial results will be deemed to be final and official.

12.6.2. Format of Results

All results should have the CIVL ID number for each pilot recorded. The following formats are acceptable for input to the WPRS:

- FSDB file from FS
- An Excel format (.xls or .csv) file with the results in the following order:
- Name (First name followed by family name) Nation (IOC abbreviated codes) Total (score) FAI_licence (number) CIVL_Pilot_ID
- PDF files are not acceptable.

12.6.3. Task Dropping

Results of competitions which drop tasks will be uploaded using the full number of tasks flown to determine the Ta factor. If a competition organiser drops an entire task for all pilots this is effectively an invalid task and will not be counted towards Ta in the WPRS formula.

12.6.4. Responsibility

It is the NAC's responsibility to make sure that the results are correct and submitted on time.

Where a 2nd Category event is not organised by or on behalf of a NAC (e.g. Paragliding World Cup events), the hosting NAC is responsible for ensuring that the correct results are submitted on time by the Competition Organisers.

12.6.5. Finality of Results

All results and rankings published on the CIVL website will be deemed to be final after 3 months have elapsed since the last day of the competition.

12.7. Penalties, Complaints, Protests and Appeals

12.7.1. Penalties

Penalties may be imposed for infringement of, or non-compliance with, any rule or local regulation, including unsporting behaviour.

The severity of the penalties may range from a warning as a minimum to disqualification, as appropriate for the offence.

The penalties imposed may be one of the following:

- Warning.
- Operational disadvantage.
- Alteration of placing order.
- Disqualification.
- Cross-Country: deduction of points. This may be a finite number of points or a percentage of the pilot's score. A finite number may be up to the entire score of a pilot for that day.
- Accuracy: imposition of maximum score for the round.
- Aerobatic: deduction of points as specified in Section 7B 7.2.2.

Officials entitled to impose penalties:

- Cross-Country: Meet Director.
- Accuracy: Meet Director, Chief Judge.
- Aerobatic: Meet Director, Safety Director, Competition Coordinator, Chief Judge

12.7.2. Complaints

A complaint shall be made by a pilot or Team leader, in writing, preferably in English

- To the Meet Director or deputy Meet Director in Cross Country and Aerobatics
- To the Chief Judge in Accuracy

Complaints will be dealt with expeditiously.

Complaints and rulings on complaints shall be published on the headquarters official board.

12.7.3. Protests

If the complainant or the Team Leader is not satisfied with the complaint ruling, a protest may be made, in writing, preferably in English, to the Meet Director or deputy Meet Director.

The Meet Director will immediately pass the protest to the Protest Committee.

The protest shall be published on the headquarters official board.

12.7.4. Protest Committee

A Protest Committee shall be implemented either when needed or before the start of the first task/round/run.

The Meet Director is responsible for the implementation of the Protest Committee.

The Protest Committee may be appointed by the Meet Director or elected by the pilots or a mix of the two.

The Protest Committee is composed of a minimum of three members.

When a Protest Committee member is involved in the protest, this person shall be temporarily suspended from the Protest Committee until the protest has been resolved.

A minimum of three members is required for the Protest Committee to rule.

The Protest Committee will rule as soon as possible on the protest, in writing, preferably in English. Ruling on the protest shall be published on the headquarters official board.

12.7.5. Appeal

There are three levels for appealing a decision of the Protest Committee.

1. The first level is an appeal to the organiser's NAC. The CIVL Bureau must be in copy of the appeal. The deadline for this appeal is 7 days after the end of the event.
2. If the complainant does not agree with the NAC's decision or if the NAC does not answer within 30 days after receiving the appeal, an appeal may be made to the CIVL Bureau. The complainant has 7 days to appeal to the CIVL Bureau. The cost of this appeal is stated in Section 7 K, to be paid to the CIVL/FAI. It is not refundable whatever the outcome of the appeal. The CIVL Bureau shall appoint a 3-member Board of Inquiry. The Board of Inquiry will investigate and uphold or discard the NAC's decision within 30 days after the new appeal was received.
3. If the complainant does not agree with the CIVL Board of Inquiry's decision or has not received a ruling within 30 days, a new appeal can be made to CASI under the conditions set in the General Section of the Sporting Code 6.5 and 6.6.

12.7.6. Documentation

All involved (Meet and Safety Directors, Chief Judge, Protest Committee) shall keep in mind that a protest ruling might be appealed to FAI. It is of the utmost importance that all documents related to penalties, complaints and protests are collected by the Event Director and kept for at least 90 days after the end of the event.

12.7.7. Recommendations

- Before protesting, the complainant or the Team Leader are encouraged to read Section 7I Guidelines and Templates, Chapter 7. The Protest Form Template may be used (Annexe F).
- Before ruling on a protest, the Protest Committee members are encouraged to read Section 7J CIVL Jury Handbook, Chapter 6.
- A protest fee may be required. In Cat 1 events, it is not larger than \$50 US or €50. If the protest is upheld, the fee is returned to the complainant.

12.7.8. Deadlines

Deadlines for complaints and protests should be defined in the local regulations. It is suggested:

The deadline to make a complaint when requesting a correction of the provisional results is

- In Accuracy, one hour after the publication of the provisional results.
- In Cross Country, four hours after the publication of the results. When the results are published after 22:00h, the deadline is no earlier than 11:00h the next day.

The deadline to make a protest is

- Within four hours of the result of the complaint being published at the main headquarters.
- Within one hour on the last planned two tasks/rounds/runs.

12.7.9. Penalties, Protests, Complaints, Appeals in PG Aerobatics

When a pilot notices any mistake in the list of manoeuvres published at the end of the run (manoeuvre name, direction, choreography bonus...) the matter should be addressed directly to the Chief Judge, who will verify and correct when necessary.

A pilot who thinks that a score has been penalised by a judging mistake or any other occurrence or decision, can complain to the Protest Committee within 30 minutes after the publication of the run results.

If a pilot addresses a complaint directly to the judges, a penalty with one or more warnings will be applied, according to S7B Chapter 7.2.2.

The Protest Committee reviews the complaint and assesses whether forwarding the protest to the Chief Judge is justified. If yes, the Protest Committee will forward the complaint to the Chief Judge.

The Protest Committee discusses the complaint with the judges, bringing evidence when available.

The Chief Judge will make a decision at the end of the discussion. The Chief Judge's decision is final and cannot be appealed.

12.8. Safety

It is recommended that Category 2 events comply with the safety requirements for Category 1 events as well as any additional ones needed for local conditions. If no separate Safety Director is appointed for a 2nd Category event the Meet Director must give a safety briefing to all pilots prior to the commencement of flying.

12.9. Minimum requirements

The following requirements are mandatory in cross-country and paragliding accuracy events.

12.9.1. Web Page

A webpage in English (website, Google doc, social media page, etc.) must include key mandatory information.

Link to the webpage must be provided when the application for Cat 2 status is processed or at the latest before the start of the online registration (whichever comes first). When failing to do so, the event will be de-sanctioned.

In case there is no online registration, the local regulations shall be published on a webpage and submitted to CIVL together with the application for Cat 2 sanctioning.

12.9.2. Local regulations

Local regulations in English are mandatory.

A template is available in Annexes that will be included in Section 7.

The local regulations must be provided when the application for Second Category status is processed or at the latest before the start of the online registration. When failing to do so, the event is de-sanctioned.

The local regulations must be signed and dated by the organisers when they are published. The organisers have the right to amend local regulations. The new version must be stamped with the new date.

12.9.3. Meet Officials

The event organisation includes a Meet Director and eventually a Safety Director whose main responsibility is safety.

The Meet Director and Safety Director may not be a competing pilot or a team leader during the competition.

In paragliding accuracy, no member of the judging team may be a pilot or a team leader.

Any other Official in the organisation may be a pilot or a team leader in the competition, provided that an assistant is available to fulfil the Official's duties in case of necessity.

12.9.4. Safety

The Meet Director and/or Safety Director shall have a list of all available pilots' live tracking and communication devices (including private devices and those provided by the organisers) – GPS and satellite trackers, personal phones, beacons, etc.

In paragliding accuracy the Meet Director or Safety Director will check the pilots' equipment.

12.9.5. Pilots' Briefing

It is mandatory for the organisers to hold a general pilots' briefing before the first task. The briefing must include as a minimum:

- All matters concerning the safety of the event
- Communication and report back information
- Election of the Task and/or Safety Committees, and Protest Committee if any-
- Discussion of the competition parameters (Cross-Country)
- Discussion of Launch requirements

It is mandatory for the pilots to attend the general pilots' briefing.

12.9.6. Task setting (Cross-Country)

The Meet Director is responsible for setting the tasks.

The Meet Director is assisted by a Task and/or Safety Committee comprising at least 3 pilots elected by the pilots during the mandatory pilots' briefing.

12.9.7. Results

The competition results are published daily on the webpage.

In paragliding accuracy the results are published according to the rules in S7C and local regulations after each round.

12.9.8. Penalties, Complaints, Protests, Appeal

See Section 7 Common 12.4.

13. UNSPORTING BEHAVIOUR AND OTHER MISCONDUCT

This Chapter provides rules and guidelines for penalising when necessary, the misconduct of participants before, during or after CIVL First and Second Category events.

These participants include:

- Competitors, team leaders, ground crews, accompanying persons...
- CIVL representatives: stewards, jurors, judges, technical delegates...
- Members of the event organisation.
- Members of teams who organise circuits or tours of events (World Cups, Asian Cups...)

13.1. Unsporting behaviour

Unsporting behaviour is deemed as behaviour by a person or team that violates the sport's generally accepted rules of sportsmanship and participant conduct. Typical (but not limited) examples are:

- Competitors, their team leaders or members may be annoyed by rulings or other decisions that adversely affect one or more pilots. While, it is reasonable to expect disagreement or argument on the part of these individuals, abusive or taunting language, excessively loud delivery, physical abuse, threats, etc. are not acceptable.
- Rules in some competition disciplines may require participants to fulfill certain requirements like reporting back, returning back live-trackers, etc. Failure to complying with these requirements may be considered as unsporting behaviour.

13.2. Other misconduct

Other typical (but not limited) examples of misconduct that are deemed unacceptable:

- Not following mandatory rules
- Abusive activity on social media
- False accusations, threats
- Bringing the sport, CIVL or the FAI into disrepute

13.3. Penalty process

- Unsporting behaviour or other instances of misconduct may happen before, during or after a competition.
- During a competition, penalties may be awarded according to the rules of the event (sporting code, local regulations...).
- In serious cases, a report of the alleged unsporting behaviour or other instances of misconduct should be delivered to the CIVL Bureau. The Bureau will review the report and make enquiries. The plaintiff's report should be as precise as possible and be accompanied by the names and addresses of witnesses if any.
- The Bureau will decide whether further action is needed.
- If appropriate, the Bureau may refer the plaintiff to the appropriate NAC, or may appoint an impartial 3-member Board of Inquiry, or refer directly to the FAI President for further action.
- As applicable, the CIVL Board of Inquiry will investigate the allegations and evidence. The defendant will be invited to make comments and to provide a defence. The plaintiff will be invited to comment on the defendant's response.
- When ready, the Board of Inquiry will recommend to the Bureau a course of action and where applicable a suggested penalty.

- The Bureau will then decide on the course of action and whether to impose penalties.
- The parties will be notified of the Bureau decision and it will be published on CIVL website.

13.4. Penalties

13.4.1. During an event:

See the respective chapter of Section 7 of the Sporting Code

13.4.2. Before or after an event:

Penalties imposed by the CIVL Bureau may be (but are not limited to)

- Letter of reprimand
- Request for a letter of apology
- Suspension or life ban for participating in CIVL events
- Reduction of individual or team score
- Not ranking the event
- Exclusion from the management of or being an official at CIVL events

CIVL will make available the findings of the Board of Inquiry subject to any appeal.

13.4.3. Appeals

The treatment of appeals is defined in the General Section of the Sporting Code 6.5 and 6.6.

14. THE WORLD PILOT RANKING SYSTEM

The WPRS (Sporting Code S7 E) is a system designed to rank all pilots who fly in competitions that are, or have been, FAI sanctioned around the world. A separate ranking is produced for each of the flying disciplines of hang gliding and paragliding.

Inside flying disciplines ranking are produced by the following categories: Overall, Women, Junior, Nations, Continents.

Each ranking is calculated only from the results of FAI sanctioned competitions.

Results received by CIVL are deemed to be correct and all pilots will be ranked accordingly.

The current WPRS formula gives each pilot ranking points.

Nation rankings are calculated by aggregating the individual WPRS points of a specified number of pilots from each nation.

Rankings are also currently produced by Continent.

Junior class shall be called Junior U-XX (for Under XX)

Junior rankings are calculated by aggregating the individual results of pilots of following ages:

—XC and Accuracy events: Junior U-26.

—Aerobatic events: Junior U-23.

The age is determined by the calendar year in which the pilot has his birthday.

Under exceptional circumstances, **the CIVL Bureau has the** right to allow WPRS ranking points from competitions that have not been FAI sanctioned **or pilots without FAI Sporting Licences..**

CIVL Ranking WPRS Website: <http://civlcomps.org/>

It is mandatory for organisers of First and Second Category events to register their event in the CIVL EMS (civlcomps.org).

It is mandatory for pilots competing in First and Second Category events to be registered in the CIVL EMS.

In case of issues, only the information as found on the FAI Sporting Licences database is taken in consideration. Physical or virtual FAI Sporting Licences issued by NACs(which are not present in FAI Sporting Licence database) are not considered.

It is the responsibility of pilots to check that the information entered in the FAI Sporting Licences database are correct (name, discipline, date of validity, etc.)

Results received by CIVL are deemed to be correct and all pilots will be ranked accordingly.

NACs may control all results and rankings published on the CIVL website and ask for adjustment, especially in consideration of pilots not having FAI Sporting Licences.

All results and rankings published on the CIVL website will be deemed to be final after 3 months have elapsed since the last day of the competition.

15. CLASS DETERMINATION FOR HANG GLIDERS

15.1. The Class Determination Working Group (CDWG)

The CDWG is a temporary Working Group of CIVL. It shall consist of 3 members appointed by CIVL Bureau.

The role of the CDWG is to continue the process of ensuring that practical and effective procedures for the determination of class are in place and to make recommendations on the status of particular models of hang glider when requested or otherwise considered necessary. The following rules and guidelines are intended to provide procedures for manufacturers and the CDWG in determining the class of hang gliders.

15.2. Background

The definition of hang gliders includes the requirement that it be capable of being foot launched and landed consistently in nil wind.

The reason for this requirement is to preserve the lightweight and simple nature of the class. Weight is the ultimate factor limiting performance, so this requirement helps create a level playing field while allowing reasonable design development. In order for a glider to be classified as a hang glider by the CDWG, it must be observed to be launched and landed repeatedly in nil wind. Hang gliders with aerodynamic controls that cannot pass this requirement are Class 4 gliders.

15.3. Manufacturer Procedures

Manufacturers with a new design that they wish to enter into a CIVL sanctioned competition must contact the CDWG. The CDWG will either accept a videotape demonstrating the required take-offs and landings or the manufacturer may choose to demonstrate the procedure for a CDWG member or appointee. Evidence submitted solely by videotape will be ruled by CDWG. Evidence from an independent CDWG member witness or an appointed witness will be reviewed in a timely fashion. When it is submitted, it is suggested that two weeks be allowed for proper review.

15.4. Videotape Requirements

Videotape submitted as the sole proof of nil wind capabilities (i.e. there is no official CDWG witness) must include the following:

- A continuous film of each flight including take-off and landing shot from the landing area. A total of two flights demonstrating safe take-offs and landings must be shown. Both take-offs and landings must be clearly visible on the videotape. Note: the use of flaps is allowed at any point in the flight.
- The slope of the take-off must be shown by filming the slope perpendicular to the fall line with the horizon or a visible level as reference. A normal lens setting should be used for at least part of the shooting.
- The wind streamers near the take-off and near the landing must be clearly shown in the same continuous video as the take-off and landing. It is suggested that the cameraman zoom in or walk to the streamer while filming.

- Still photos of two landings with a date and time stamp (data back camera) must be submitted along with the videotape as evidence that the flights occurred successively within a reasonable time period.

15.4.1. Further Requirements

15.4.1.1. Nil Wind

For the purposes of demonstration, “nil-wind” shall mean a headwind of less than 1 m/s (3.6 km/h; 2.2 mph).

15.4.1.2. Launch Angle

The maximum angle of the launch slope is 30° from the horizontal.

15.4.1.3. Streamers

A light material strip such as Nylon or surveyor’s tape or lengths of yarn must be used as streamer material to indicate nil wind (see 1.5). The streamer material must be free from the staff, which can be accomplished by slanting the staff. By definition, slight stirring of the streamer is allowed. We suggest lifting and dropping the streamer to prove it hasn’t been artificially stiffened.

15.4.1.4. Foot Launch

Take-offs and landings, to be successful, must occur solely on the pilot’s feet with no part of the glider touching the ground except a wing tip and/or the rear end of the keel (or tail if so equipped).

15.4.1.5. Glider Weight

The manufacturer must declare the weight of the glider as tested. The manufacturer must submit an affidavit stating the maximum weight of the glider to be used in competition. In addition the wing dimensions including span, root chord, tip chord (measured at the most outboard point where both the trailing edge and leading edge are straight) and area. New editions of a design which change wing loading must be re-examined.

15.4.2. Witness Requirements

If a CDWG member witness is used, no videotape is necessary, but a written report describing the two take-offs and landings as being successful must be made by the witness. This report must include the take-off slope angle and the wind observed. Accompanying videotape is desirable. The manufacturer is responsible for all expenses of the witness, including travel, lodging and food. Note: this procedure can take place at any agreed upon site.

If an appointed witness is used, a written report must be made and videotape fulfilling the requirements of 16.4 must be submitted.

Note: the advantage of this procedure is that it can take place anytime suitable arrangements can be made for an appointed witness to be present.

15.4.3. Committee Responsibilities

The CDWG will meet at the CIVL plenary meeting and rule on any outstanding requests. The CDWG will rule on witnessed submissions between plenary sessions in a timely fashion. At least one member must view submitted videotape or the flights in this case.

15.4.4. Fairings

Fairings are allowed only in Class 2 gliders. For the purposes of this document a pilot fairing is a streamlined structure rigidly attached to the glider frame, partially or fully enclosing that pilot and as much as practical the surrounding structures. The shape of the fairing is designed to minimise the contribution to the total parasitic drag of the glider, the pilot and the pilot surrounding structures. Windscreens fairing the pilot's head that are not directly attached to a helmet are not allowed.

15.4.5. Electrical Auxiliary motors

Auxiliary electrical motors are allowed only in Class 2 gliders, and where specified as acceptable in the local regulations.

16. GLOSSARY OF TERMS AND ABBREVIATIONS

This section amplifies a number of terms which are used in the main text and gives some generally accepted definitions and abbreviations relevant to air sports

Alphabetical

2D GPS	GPS model which does not include altitude encoding in the track log
3D GPS	GPS model which includes altitude encoding in the track log
Aircraft	See Chapter 2 for definitions, page 2 - 1
Altitude	The vertical distance from mean sea level (MSL). See also `QNH', and `Height'.
AMSL	Above Mean Sea Level
ASC	Air Sport Commission responsible for a specific Sporting Code section.
AUW	All Up Weight / Mass
C	(Temperature) - Celsius
Certification	The signature on and preparation of certificates and other documents concerned with the process of flight verification with a view to validation of an FAI Flight Performance
CIVL	Commission Internationale de Vol Libre, the International Hang Gliding Commission
C of A	Certificate of Airworthiness
CP	Control Point
FAI	Fédération Aéronautique Internationale, with its headquarters in Lausanne
g	Acceleration due to gravity (9.81 m/sec ²)
G	Multiple of gravity force on an aircraft under acceleration
Galileo	The future European GNSS system, equivalent to the Russian GLONASS and the US GPS satellite navigation systems
Geodetic Datum	The mathematical model of the earth (and its orientation to the earth) which is used in laying out the positional reference system (lat/long, kilometre grid, etc) before the map projection process is used to transform the three-dimensional surface of the earth model (including topographical features and the reference grid) into a flat map sheet. Some 200 Geodetic Datums (GD) are in current use and generally were chosen for the `best fit' of their particular mathematical model to the shape of the earth over the map area concerned. Lat/long figures, to be unambiguous, should quote the GD used which is normally given in the data at the edge of each map. The WGS 84 Datum is generally accepted as the best simple mathematical model for the <u>overall</u> shape of the earth, and is an ellipsoid with an equatorial radius of 6378.1370 km and a polar radius of 6356.7523 km, and is centred on the earth's centre and orientated to the spin axis. PC-based transformation programmes are available which convert latitudes and longitudes from those relevant to one Geodetic Datum, to WGS 84 or other Datums. Differences vary from a few metres to a few kilometres. These differences are not errors, each lat/long figure is perfectly correct, it is only the different GD (world mathematical model) which changes the lat/long figures for a given point on the earth's surface. Therefore, for distance calculations to be accurate, the lat/longs of points at the beginning and end of the leg concerned must be with respect to the same G (see GS para 7.3.1.1). The calculations themselves use these standardised lat/longs, applied to a distance calculation formula based on the FAI earth model given in GS para 7.3.1.1. The WGS 84 Datum can be used in deriving lat/longs for long distance calculations and is used by ICAO and national aviation agencies in defining highly accurate standardised runway datums for the future use of GPS as a runway approach aid.
Geodesic	The shortest distance between two points on the surface of an ellipsoid.

FAI Sporting Code, Common Section 7 - 1st May 2023

GLONASS	Global Orbital Navigation Satellite System, the Russian GNSS system similar to the US
GPS	
GNSS	Global Navigation Satellite System (Generic term for all systems such as the Russian GLONASS and the US GPS)
GPS	Global Positioning System (US GNSS System presently managed by the Department of Defense)
GPS (2D)	GPS model whose track log does not include altitude coding.
GPS (3D)	GPS model whose track log includes altitude coding.
GS	The General Section of the FAI Sporting Code
Height	The vertical distance from a given height datum such as the take-off place. See also 'QFE', and 'Altitude'.
HG	Hang Glider
Homologation	The validation of a Flight Performance by an NAC or FAI for record purposes. Also the process of approving a particular model of glider for competition purposes.
Host	When used in conjunction with NAC this refers to the NAC in whose territory the event is run.
hPa	Hecto Pascal (Pressure unit, equal to a millibar)
IAS	Indicated Airspeed
ICAO	International Civil Aviation Organisation (HQ in Montreal, Canada)
ISA	International Standard Atmosphere. The ISA to be used for FAI matters is given in ICAO Document 7488 tables 3 and 4. It assumes a temperature and pressure at sea level of 15°C and 760 mm of mercury (or 1013.25 mb/hPa), and a constant temperature lapse rate from sea level of 6.5°C per 1000 m (1.98°C/3.56°F per 1000 ft) rise in height, up to a height of 11,000 m (56.5°C) which is assumed to be the Tropopause, above which constant temperature is assumed. Pressure figures from this ISA are used in calibration of barographs, because although the real atmosphere varies from day to day, for calibration purposes a set of internationally agreed figures are needed so that all calibrations are to the same datum, whether or not such figures correspond to 'true' height on a given day. A similar principle is used in calibrating pressure altimeters for aircraft, so that all aviation activities have a common standard of pressure height indication in the cockpit.
MD	Meet Director, also known as the Event Director and referred to in GS Chapter 4 as such
min	Minute, unit of time (UT), compared to 'arcmin' which is 1 minute of angle
m/s	Metres per Second
MSL	Mean Sea Level
NAC	National Airspace Control
O	(FAI Class) - Hang Gliders and Paragliders
O&R	Out and Return
OO	Official Observer
PA	Paragliding Accuracy
PG	Paraglider
QFE	Pressure Setting which indicates zero altitude when at airfield height
QNH	Pressure Setting which indicates height above sea level
SD	Safety Director
S7	Section 7 of the FAI Sporting Code i.e. this section. Also sub-sections 7A to 7D.
Shall	See under 'Wording'
Should	See under 'Wording'
Space	Above the earth's atmosphere, in earth orbit or above

Sprog	A strut, outboard of the wing, which supports an area of the sail on a flexwing hang glider. Sometimes referred to as a “wash out rod” or “anti dive stick or strut” in the past.
TAS	True Air Speed
TL	Team Leader
TP	Turn Point, also see WP, Waypoint
Tracklog	The record of a flight produced by a GPS
Tracklog point	The individual components of a tracklog
UT	UTC to the local hour convention
UTC	Universal Time Co-ordinated (ex-GMT)
Validation	An act of ratification or official approval. In FAI terms, the act of approving a Flight Performance (or an element of one such as reaching a Turn Point) for FAI purposes.
Verification	The process of checking and assembling evidence with a view to validating a Flight Performance
Vs	Stalling Speed
WAG	World Air Games
WP, Waypoint	A generic term for either a start, turn or finish point claimed as part of a flight performance.
WPRS	A CIVL designed and administered system of ranking pilots from FAI sanctioned competition results.
WGS 84	See under ‘Geodetic Datum’
Wording	The use of “shall” and “must” implies that the aspect concerned is mandatory; the use of “should” implies a non-mandatory recommendation; “may” indicates what is permitted and “will” indicates what is going to happen. <i>Italics are used for explanatory notes.</i>
WPRS	World Pilot Ranking Scheme. A CIVL designed and administered system of ranking pilots from FAI sanctioned competition results.
