

Libya Air sports Federation(LASF) Libya Education report 2013

As Libya takes its first steps into democratic and peaceful country. LASF has gone into reforming and defining its goals, one of the most important goals is spreading Aeronautics & space Education Knowledge among our youths and children, for this purpose We have set ambitious Plans turned into programs base on establishing cooperation with the public & private Education institutions and others which related to youths and children to, also LASF has introduced spread Aeronautics & space Education as part of children entertainment; through visits, games and air show events.

Introducing Aeronautics and Space Education:

LASF has started national education project aiming to

include the Aeronautics & space Knowledge in the Libyan education system as activities for the youths and children through the cooperation with Libyan ministry of education.

LASF education and media department has prepared special series of educational books that give children basic aviation Education and knowledge through coloring activity.

These series are divided into three volumes according to children ages, the first volume (4-7 years) second volume (7-12 years) third volume (12-16 year) which mean that our program will include the students from elementary to high Schools.

We have appointed public and private sponsors to finance printing the books with large quantities, which will be distributed with coloring pencils to the children in the events.

LASF partnership with Libyan scouts Commission:

LASF has reached agreement with Libyan scouts Commission. According to this agreement we will work with scouts as Partners,

in the first stage we will introduce aviation education and Knowledge to the Libyan scouts through Lectures, games and visits (LASF has ordered paper planes and remote control planes to be part of scouts aviation education program), the second stage will include establishment

of air scouts with the cooperation with air sports clubs in Libyan cities.

Arranging Visits and air show events for children

LASF has invited children schools to visit the Libyan parachute training camp ,allowing them to speak and play with the parachuting team members. future visits will include airports with guide who will. LASF will arrange air show events for children this year , on may there will be two big air shows in Tripoli and Benghazi ,(LASF is importing paper planes and remote control planes to be distributed to children in the events, scout will be part of the events.

Producing Short Aviation Education documentaries

LASF Education media department had produce short documentaries that give the youths and children basic aviation knowledge this series of documentaries speaks on many aviation issues the build of this documentary is based on Local aviation scenes and simple comments.

Based on agreement with Libyan ministry of media this documentary will be broadcasted on national public TV Channels .

Release the first Arabic air sports magazine

LASF education & media department is working to release the first Arabic language magazine specialized in air sports field , the magazine will continue :news , articles , reports, interviews , that related to airs sport our goal to give air sports information to the Arabic public , and to encourage communication between people with the same interest, the magazine will continue content brief in English .
