## Software

And oral report was given by the group chair Igor Erzen.

The urgency to move forward with Airscore was underlined. It was also addressed to get some volunteers help to support AirScore. Thomas Senac reminded for having a process in place to share all tracks after a task which will solved once we get Airscore working.

It was also discussed setting up one webpage to list all CIVL software.

CIVLcomps development is underway. It is the system that should keep CIVL history.

CIVL-Plenary-2024-Annexe-38j - Proposal Bulgaria - Goal line orientation.pdf - The proposal was discussed and studied all pro and cons. The discussion concluded that the cons outweigh the pros since it could potentially create an inconsistent line orientation which would be very problematic. A recommendation was set that simply putting a small cylinder before the goal would have the effect of correcting the goal line orientation.

CIVL-Plenary-2024-Annexe-38O-Proposal-UK3-Freeze-WPRS-for-the-1st-year-update2.pdf - The meeting carefully studied possible variants of devaluation curve modification. The desired variant should have very slow almost no devaluation in the first 6 months, steep slope and smooth ending. The plenary decided to ask the Software WG to work on the curve's tda and tdb parameters.
