

Scoring Software Working Group Report

IGC Plenary, 3 March 2017

Dear Delegates,

The SSWG was very active before the summer break and during last month, discussing the mathematical methods to be used to score the performance in gliding. It was a great discussion on the different alternatives, the pros and cons of each one. The outcome of those discussions is the “Year 2 proposal” presented to the plenum.

Another subject that several contest organisers asked us, is the validation and digital signing of the scoring scripts, so we are sure that those scripts are the official ones and have not been altered. We plan to put some work in that area this year and present a proposal for next year..

Angel Casado
