

## IGC Ranking List report for 2008 Plenum

The introduction of Annex D was the main occupation of the Ranking list group in 2007. The new Annex was approved by the Plenum in March.

Additional text to include Grand Prix competitions and to accommodate shared entries and two seater entries was approved by the Bureau and are included in the published Annex D.

We are still considering alternative methods of applying sanction fees, however we first need to consolidate our current system and it's associated credit control.

The number of competitions continues to grow and the number of pilots included in the system now exceeds 2800.

The main issues taking the attention of the Ranking List team in 2008 are:

To find new ways to improve level of pilot information held on the pilot database.

To encourage more pilots to add photos to their information.

To improve the routes of communication with competition organisers and enable more timely reporting of competition results and their accuracy.

An ongoing project for the future use of the Ranking List is the development and potential uses of the Database.

In 2008 we are seeking help from someone who can make contact with pilots on the database to improve the completeness of the pilot information.

There will be a short presentation at the Plenum to highlight the additional new rules and some of the recent changes in the system.
