

10th FAI Junior World Gliding Championships 2017

10th FAI Junior World Gliding Championships Clases Standard, Club

Proposed period for the event:

Training: July 21-28

Competition: July 29 – August 13

Applicant

Lithuanian Aeroclub

An aerial photograph showing a white glider with a black cockpit flying over a vast, flat landscape. The terrain is a patchwork of brown and green fields, with scattered trees and small clusters of buildings. The glider is positioned in the center of the frame, flying towards the left. The text is overlaid in the lower half of the image.

**Lithuania – flatland country!
Good outlanding possibilities,
and very friendly country people**

Pociunai

54' 39,40" N, 024' 02,00" E

1.100 m

1000 m

IGC events in Pociunai:

1st World Women's Gliding Championship

12th, 14th, 15th and 16th European Gliding Championship

Number of towplanes
will depend on possibilities to lift all gliders in
approximately 0.8 - 1.1 hour

Maximum safe number of gliders – 150

Meteorological conditions:
average temperature in August - 19°C
cloud base and climb rates - 1500 m and 1.5 - 2.5 m/s

A photograph of a sky filled with various cloud formations, including large, dark, overcast clouds at the top and smaller, white, puffy clouds below. The sky transitions from a deep blue at the top to a lighter blue near the horizon. In the foreground, a green field is visible, with a small white car parked on the right side. The overall scene suggests a clear day with some cloud cover.

Look to the sky!

Average speed: the 130 km/h... minimum

Tasks

The Racing tasks and Assigned Areas Speed tasks

Typical tasks to be expected: triangles from 200 up to 600 km

Airspace restrictions

No serious airspace limitations towards the West, South and East from Pociunai airfield. Possibility to fly to Poland.
