

Proposal from Germany

Club Class

Sc3a, Appendix 3, Club Class handicap list.

Min. handicap in club class should be limited to 0,98

Reason: Today's handicap list features its minimum at 0,98. The maximum at 1,09. From minimum to maximum it's a difference of 11%. Whereas 1,09 is defined as the max. of today's handicap list. The lower end of 0,98 is not defined as a minimum. In order not to exceed this 11% difference, the handicap should be limited at its lower end. This limits the spread from low end to upper end.
