

PROPOSAL TO IGC PLENARY 2010

Proposed by The Ranking List Manager

This Proposal accompanies the 2009 Ranking List report.

It is Proposed That:

- 1. The entry factor used in the calculation for the competition quality factor be changed from 15 to 10.**
- 2. This change to be effective from 1.4.2010**

This Proposal affects:

Annex D rules for IGC Ranking List
Rule 5.5 Competition Quality Factor

Reasons supporting the Proposal:

The maximum Rating a pilot can achieve from a given competition is limited by the competition quality factor, the quality factor takes into account the number of competitors and the number of competition days. To reduce the impact of this factor on competitions held in smaller countries or countries with significant distances between competition pilots the Ranking list working group consider it appropriate that this factor be reduced.
