

President's Proposals

There are no proposals from the CIVA President this year. Please see Agenda item 9.7 Urgent Proposals which collates all Urgent, Safety and Expedited proposals into a single document.

However – the proposal that I introduced at the 2018 conference in Warsaw remains open, with the subsequent medal designs ready to be debated by plenary to determine –

1. Which of the published designs is considered most appropriate
2. In the light of item-1 to consider the likely cost associated with a move to adopt the selected design and proceeding to manufacture
3. Subsequent to 1 and 2 above, whether in fact to proceed with this change to the CIVA medals or to continue with the existing medals manufactured by Faude & Huguenin in Switzerland, that we procure through FAI.
