

## Records Subcommittee Report

### Members:

Art Greenfield (USA)

Chris Booyesen (RSA)

Marcel Meyer (SUI)

The Records Subcommittee has been engaged at various times during the year to interpret the rules found in the FAI Sporting Code, Section 2. This has been done at the request of FAI headquarters staff to address questions arising from record attempts in various stages of completion.

The committee is proposing no changes to Section 2 at this meeting. However, FAI is trying to eliminate overlap in all the various sections of the Sporting Code, and has targeted the means of propulsion Group VI (Electric) in Section 2. Group VI is a broad classification which includes all forms of electric, including solar power, and it overlaps with Section 13 of the Sporting Code for Solar-Powered Aeroplanes. The Records Subcommittee will address this issue during the coming year.
