FAI Commission Internationale Medico-Physiologique
Report to the 113th FAI General Conference
Lausanne, 5-6 December 2019

Reported by: Marja Osinga, president

1. Important activities, projects or events since last FAI General Conference:
   a. Review of new aeromedical regulations ICAO, EASA, FAA, concerning air sports
   b. Participation in EASA / ICAO Medical Expert Group, to discuss new rulemaking
   c. Executing FAI Anti-Doping waivers (TUE) for FAI athletes, discussing contentious cases
   d. Collecting aeromedical data in flight safety and accidents statistics, published by Peter Saundby, in order to develop an Expert Opinion to the FAI EB on specific medical requirements in air sports

2. Positive and negative results:
   a. Positive:
      1. Cooperation with EASA, ICAO, AsMA, AERO, Europe Air Sports, Soframas, IAASM etc
      2. Attendance at FAI Sport Commission Meetings (IGC)
      3. Support Aeromedical Examiners in EASA Acceptable Means of Compliance, to reduce administrative burden in medical assessments
   
   b. Negative:
      1. Difficulties to manage large number of new editions in WADA

3. Main problem(s) encountered and solutions adopted:

   a. Defective knowledge of Anti-Doping rules and TUE procedures in FAI athletes. Solutions: promotion activities. Cooperation with AD manager Ségolène Rouillon is very effective. Regular attendance of Aeromedical / Anti-Doping conference is essential

   b. Number of active delegates in CIMP is decreasing. Solution: actions to invite more delegates and alternate delegates. For mental health issues psychologists are invited. Delegates from all continents and all divisions of air sports are welcome, and if possible, the younger ones.

   c. Transgender athletes using prescribed testosterone (in WADA list): find solution for the various air sports, by consulting all delegates by means of a survey.

   d. EASA rulemaking is too strict for gliding and ballooning. Solution: to provide evidence on medical risk in order to achieve appropriate medical rulemaking

   e. Annual national reports from delegates: more standardization is needed. Solution: make new format
4. **Planned activities and projects for next year**:
   a. Request: FAI ACSs send more active air sport physicians and/or delegates to FAI CIMP meetings
   b. Prepare “100e anniversary of FAI CIMP” 2021 / 2022
   c. Increase cooperation with ASCs / AMEs / NACs
   d. Prepare statistics for EASA / ICAO on accidents/fatality rates and medical risk related to the type of air sport
   e. planning FAI / CIMP symposium at WAG 2022
   f. Update of the FAI CIMP website

5. **Proposals (if any) to FAI Executive Board, FAI Head Office or for the next General Conference**:
   a. Basic FAI Training on site for new FAI delegates in CIMP
   b. FAI CIMP Q&A promotion: Anti-Doping, medical issues for AMEs
   c. Train/send more FAI Experts to EASA Medical Expert Group meeting, for adequate Rulemaking
   d. Simple Financial Support System for expenses of now self paying Experts
   e. Cooperation with AOPA

6. **Free reporting**:

   Date: 30-11-2019
