Subject: Proposal that the Skydiving Records designated as G-O be reclassified – Canada

Author: Rina Gallo

Date: 2 November 2019

Proposal:

There are 1,051 former skydiving records classified as “G-O” (for “Old”). This proposal requests that these records be reclassified by the FAI head office into their proper subclass (either G-1 or G-2).

Reasons:

There is no designation as G-O in the Sporting Code. By allowing these records to be tucked away in a drawer that technically, does not exist, makes it impossible to see the historic progression of the sport via the records. This is particularly true in CF.
