Objet : Proposal from France to the 2015 Plenary.

Dear Sir,

Some countries need to know how their competition pilots fare by classes of age. The "youth" category can be specially important in dealing with government policies and finances.

So France is musing the following proposal:

- That date of birth be included in the WPRS.
This might be possible simply by crossing the FAI Licence and WPRS data bases.
If not, other solutions should be studied.
- That sorting pilots by date of birth or by category in the WPRS be possible.
(For instance, have a ranking for "under 26" years old pilots).

Stephane MALBOS
France CIVL Delegate
