

# ANNUAL REPORT OF THE CIAM SPACE MODELS WORLD CUP 2019

By Dr. Zoran M. Pelagic,  
CIAM Space Models SC Chairman

Andrija Ducak  
Space Models WC Coordinator

Prievidza (Slovakia), 29 October 2019

There were scheduled 19 Space Models World Cup events in 12 countries in America, Asia and Europe registered to the FAI Contest Calendar 2019 – Space Models. Luckily none of them was cancelled because of organizational reasons. At 5 World Cups at least one class was canceled due low attendance, mostly classes S7 and S8E/P were neither registered to the Contest Calendar nor flown. Most of the organizers were very correct in preparing and sending results lists and reports in terms of days, so the current placing lists were published after each event. This contributed very much to the dynamics of this competition.

A total of 1106 competitors from 23 countries (from which 12 were also organizing at least one SM World Cup event) from America, Asia and Europe participated in the 2019 Space Models World Cup season. A detailed list of participating countries in alphabetical order can be found below:

**Belarus (2), Bulgaria (2),** Canada, Croatia, Estonia, Germany, Great Britain, **Kazakhstan (1), Latvia (1),** Lithuania, **Poland (1), Romania (1), Russia (3), Serbia (1), Slovak Republic (2), Slovenia (1),** Switzerland, Turkey, **Ukraine (1), USA (3),** Uzbekistan. **Bold** are countries that also were the organizers of the SM World Cup events and the number of organized World Cup events in the country is set in **( )**.

Participation per SM World Cup 2019 and comparison to 2018 season is given in the table below:

Complete tables with allocated points for all sportsmen having at least one official flight are available in electronic form at the FAI WEB site <https://www.fai.org/ciam-documents> under S-SPACE MODELS - World Cup – 2019 –Results, Reports and Bulletins. Final results were distributed to all FAI SM lists and lists of WCup organizers.

CONCLUSION: Compared to last year, the number of World Cups returned to the standard, mostly due to the fact that “traditional” Space Models World Cup competition organizers like Slovakia and Serbia didn’t have organized any World Cup competitions last year. As it can be observed, the total numbers of competitors in classes S4A, S6A and S9A are stable raising. The “king” classes S7 and S8E/P remained with a stable raising number of competitors due to their complexity. This shows the attractiveness of these two classes and that rule changes adopted in 2018 attracted more people to enter these classes. As in the last years, Space Models World Cups stay the main and most effective way to promote this kind of sport.
