Personal Statement: What role did Aeromodelling play in your life and what are your aspirations for the future? (One page to be written in the Nominee's own hand and attached to this form. If written in a language other than English, then please attach a typed translation as well as the hand-written original.)

NAC Signature : [Signature]

President or Secretary General of nominating FAI National Airsport Control

(must be submitted to the FAI Office by November 15)

Personal Statement

I have built and flown models ever since I was nine years old. I started gradually, at first I joined a club where I built smaller models that were launched by hand. But ever since I flew my first F1A, I knew that I loved this sport. I like flying models much more than repairing them. I have circled my models since I was 14 and I think that circling is the most fun you can have with a model airplane. The first international competition where I circled was the 2015 Junior European Championships. I have not missed a World or Continental Junior Championships since 2014. For six years every summer I prepared for the championships. It was fun but demanding.

In the future I would like to continue ~~to~~ flying F1A and F1B. I have already made plans to bring my models over to the UK for my second year, so I could fly at the UK as well. At the University I have access to useful machines that I can hopefully use. After graduation I would like to tie my work with my hobby. Thanks to aeromodelling I have grown academically and as a human.

Karl Männik ~~hkk~~
