RUSNAK VASYL

President or Secretary General of nominating FAI National Airsport Control

(must be submitted to the FAI Office by November 15)

My name is Mykola, I've become part of this community not two years ago, and since then my life got a lot better. I finally found what I'm passionate about. This sport has helped me in many different ways. When I began I had no idea what people around me were talking about there were words were difficult for me since I wasn't very technically literate at that time, but now I can easily support any discussion and I definitely have a bigger knowledge base. For the past two years I found new information every day about all kinds of things, but mostly about Aviation, I've spent dozens of time researching new information, but I don't regret a second of this time since it will definitely help me in the future. For a while now I've been thinking what will I do with life after university, and now thanks to Aero modelling I know what I want I want to be a aircraft constructor, I want to build planes. And of course no matter what happens I don't want to quit this sport. But these are my plans for the future in real time, I became a European champion in Bulgaria and adding to that I will do my best to become the world

VasyL Rusnak

champion in 2020 Poland. But these is my plan for summer  
till then we still have winter. During winter I will continue  
working in our workshop building more models for the season.  
15.11.2019

Vasyl Rusnak
