Chris Scott LUX  
Krisztian Dolhoi HUN  
Markus Haggenev FAI Secretary General

**Additions to the agenda:**

E-sports (Lintl)  
STOL presentation (Rapiteau)

Yago Osset presented the Air Sport Challenge taken from the Air Navigation Race, it is a new competition, offering media-friendly formats. Competition rules are based around available technology. The event can be flown solo or dual, WL or AL and also paramotors. See attached slide show. The web domain [www.airsportchallenge.com](http://www.airsportchallenge.com) has been reserved.

Where would the proposal to create ASC sit within CIMA? Yes, it could be included as an annex, particularly if it had a separate working group or sub-committee. An invite could include other, non-microlight aircraft, perhaps in collaboration with GAC.

Owain Johns (GBR) joined via zoom to present the latest news on WMC2024 in England. See the attached presentation.

Michael Kania reported on progress on the WIKI migration project. The slide pack is attached. Early access to cloud.fai.org is available; contact Michael. This was a lot of work so far (at least 150 hours). Questions regarding GDPR and personal data – the WIKI is a closed working platform for CIMA delegates and not specifically for public use. Certain parts can be made public.

Laurent Rapiteau (with Pascal Noirot) presented the FRA bid for the 16<sup>th</sup> FAI European Microlight Championships 2025. VOTE: Unanimously approved.

#### Section 10 Proposals

Proposal	Description	For	Against	Abstain	Result
1a	Gold Medal	19			YES
1b	Hall of Fame	13	2	4	YES
2	CIMA Legends	19			YES
3	Young Pilot	17	2		YES
4	Results format	19			YES
5	Paramotor				N/A
6	Paramotor				N/A
7	ASC	19			YES

Proposal 3 was re-worded.

Proposal 7 – the S/C agreed the principle and created a WG of Yago, Daniel, Jiri, Espen and Rijtis. Delegates will be given 30 days to comment, the WG 15 days to respond and present to the Bureau, the Bureau will decide within 15 days and the decision will be submitted for approval at the 2025 Plenary.

The S/C also agreed to ask CASI to amend the wording of the General Section's description of a microlight. Rob Hughes agreed to ask CASI to align their description to the S10 one.

The Ann Welch Diploma (Microlights) was awarded to Jiri Prusa (CZE)

Laurent Rapiteau presented the French STOL competition format. See attached presentation.

AOB

Rob Hughes asked that Competition Directors consider the number of photos they use for photo-spotting tasks. Delegates agreed that 10 should be the maximum.

Chris Scott asked why a male/female crew is labelled 'male' and not mixed. Chris agreed to undertake research into other SCs including the General Section.

The meeting closed at 1740

Rob Hughes  
CIMA 1VP

# ASC

# The new competition format

# AirSport Challenge

# What is AirSport Challenge?

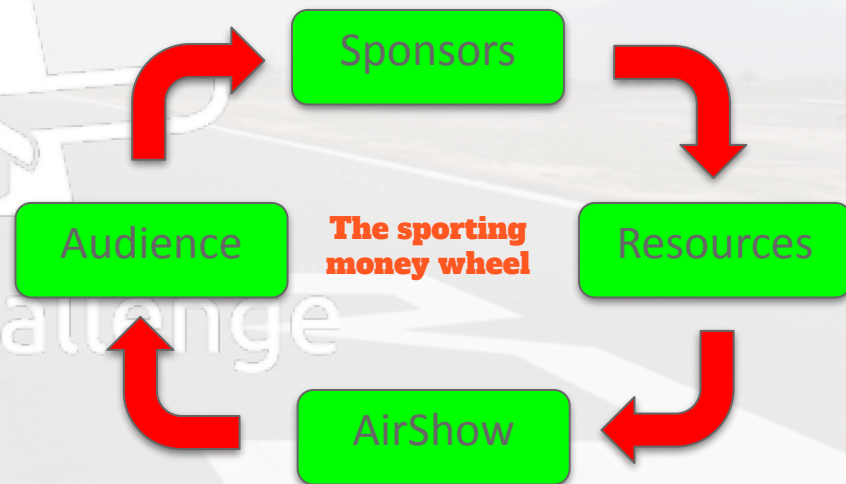

A new competition resulted from the need of a **change** in ULM AirSport and creating an attractive alternative for both **beginners** and **experienced pilots**. It uses **new technologies** to create the best **air show** possible, dynamic, easy to understand for fans and contestants. We used our experience in both classic ULM and ANR competitions to create ASC.

## Who promotes ASC?

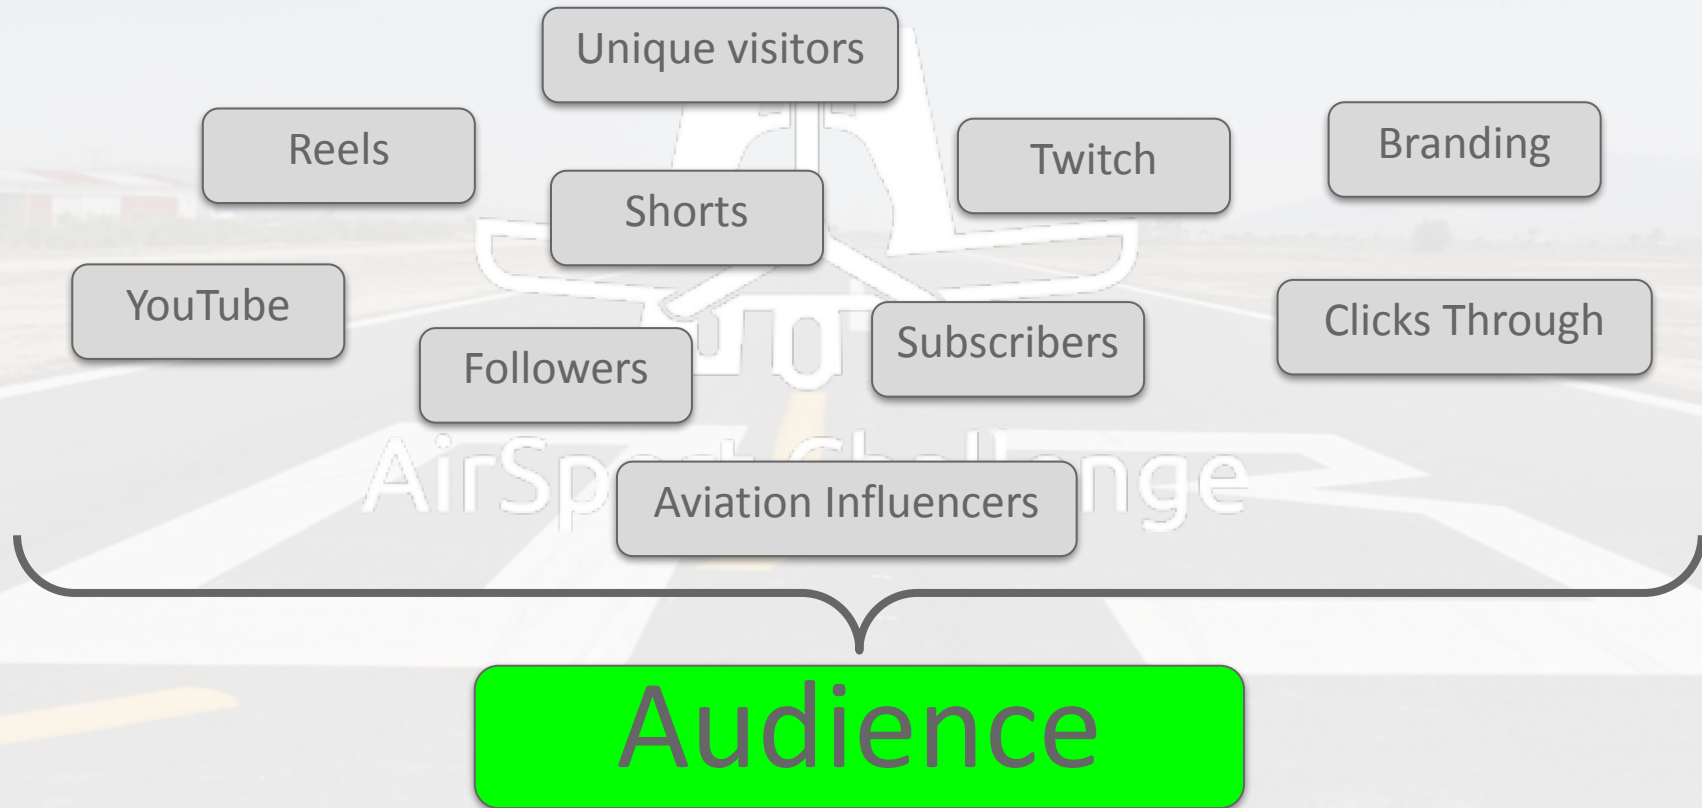

- ❖ FAI - CIMA.
- ❖ *New format Working Group* formed in the last CIMA plenary.
- ❖ New Format WG members:
  - Norway, Czech Rep., France, Germany and Spain
- ❖ National Comissions adopting CIMA ASC draft into national competition rules

# Looking for financial sustainability and Sport growth. What is all about?

Audience

# The present and future of audience and sport sponsorships

# ASC main goals

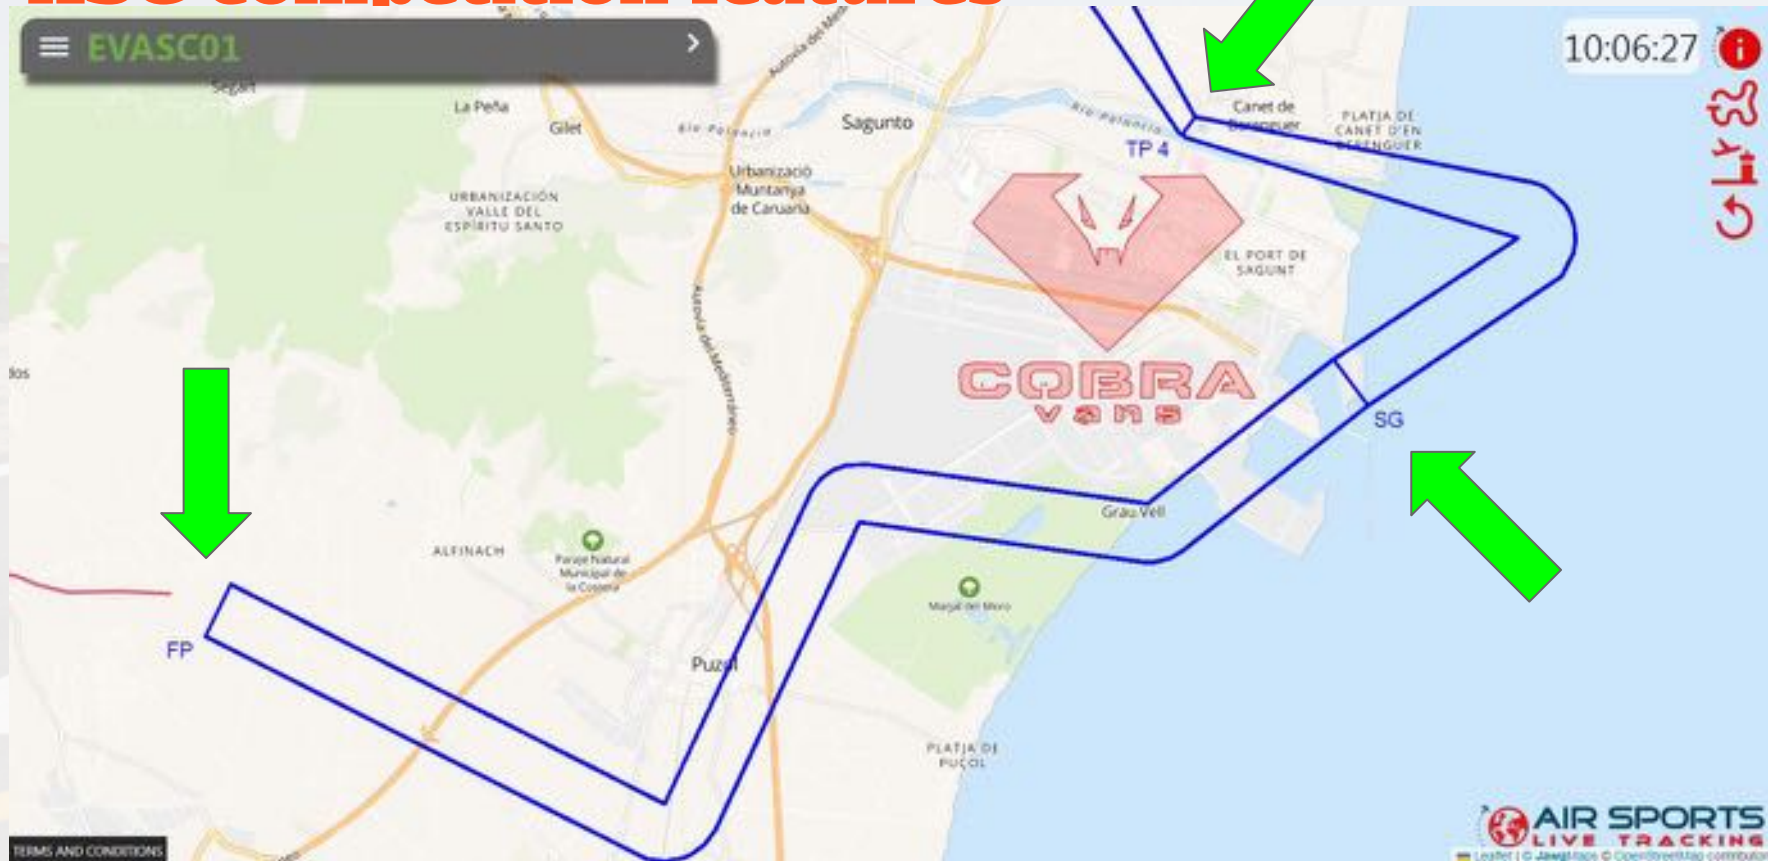

1. It should be broadcasted for new streaming and TV channels.
2. It must be dynamic, attractive and fun for any sports lover (this is my target, not only pilots or aviators).
3. Create a competition EASY to understand for both audience and competitors.
4. The use of different technologies should give the most to comply with the 3 first goals.
5. Thus it is imperative that rules are written mainly to be adapted to technologie and not the opposite.
6. Produce good content to get good AirShow. With a good Air Show we should be able to convert aviation lovers into ASC fans and followers; captivate them. It is much cheaper to get a captive viewer (fan/follower) than a new one.
7. Creating big audience, financial sustainability should be reached

# ASC competition features

1. Shorter navigation tasks, but still challenging. 40 minutes from TO to Ldg
2. Navigation inside a corridor like ANR
3. Include few known and unknown timing gates that may be set along the corridor.
4. Use variable width corridor, to get more eventual difficulty.
5. Maps “ready to fly” gives dynamism. Timing and headings are already calculated.
6. Scoring MUST BE in real time.
7. Crews may know scorings in real time during landing tasks.
8. Medals must be given immediately after the last task.
9. Orange and Red Zones to be avoided. Gives visual sponsorship area when broadcasted.
10. Ideal for promoting ASC eSport

Welcome to  
Campeonato España ASC2023

Flyer03

**Contestant:** 21 - Yago M. Osset and Miguel Borri in ECFV2  
**Task type:** AirSport Challenge  
**Competition date:** 2023-06-31  
**Airspeed:** 75 knots  
**Task weight:** 8000g  
**Departure:** 2023-06-31 11:45:00  
**Start point:** 43.52100  
**Finish by:** 16:30:00 (making will stay)

[Share on Facebook](#)

## Rules

For this task the corridor width is between 5.2 NM and 6.4 NM. Flying outside of the corridor for more than 5 seconds gives a penalty of 2 points(s) per second. There are timed gates on the track. The penalty for crossing the gate at the wrong time is 5.0 points(s) per second beyond the first 3.0 seconds. Flying off track by more than 80 degrees for more than 5.0 seconds gives a penalty of 10.0 points. Entering a prohibited area gives a penalty of 20.0 points. Entering a penalty area gives a penalty of 3.0 points per second after the first 5.0 seconds. The track has a tailoff gate.

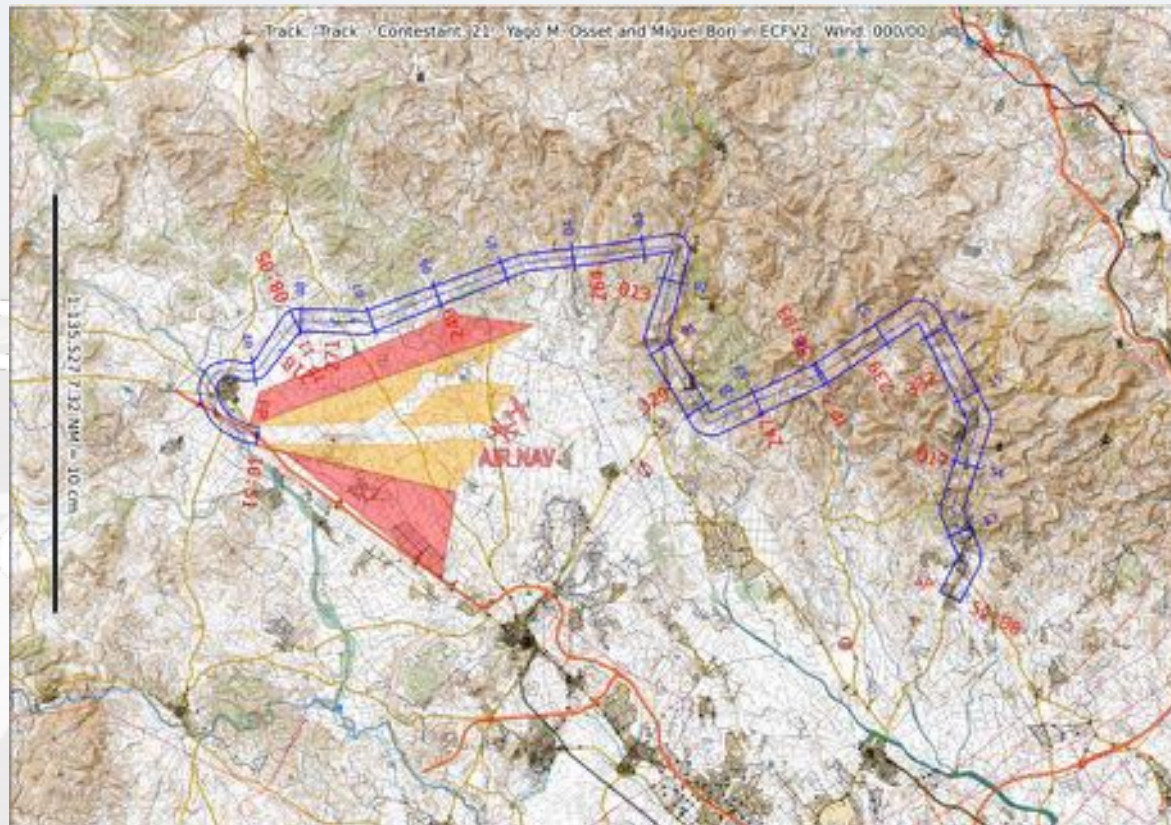

Good luck

Starting point

Finish point

# ASC Spanish Championship case

1. We started with agreements with famous aeronautical influencers. We made this video promotion reaching 55.000 views in one month: <https://youtu.be/Dncakx4YyRA>
2. 20 people with different profiles (marketing, engineers, software, streaming experts, electricians, SSNN, graphic design, etc..) involved in the organisation. 10 different sponsorships.
3. Our strategy included PR, promotion in SSNN, interviews in general media. marketing direct action with flying school database, etc...

We got:

- 1.500 people onsite spectators that paid 2€ entrance ticket and spent 3.500€ on drinks.
- Estimated media impact of 500.000 views on general media: online press, national TV news ([Google Search](#)).
- [Streaming](#) unique viewers 3.980 along the 3 hours constant live broadcasting.
- Signed a 15 years duration contract with GearUp a production company. Now with a YouTube permanent presence in their channel with 2 summary videos of Spanish National Championship:

1. Overview of Navigation task: <https://youtu.be/PbTpC0Cxht8>
2. Overview of Landing tasks: <https://youtu.be/XGdLvZh5ZAU>

# ASC Working Group route map

1. Kick off - **October 2022**. Start discussion and first proposals.
2. **February 2023** - first Draft ended to be optionally adopted by National Comissions.
3. Organisation of first ASC National Championships.
4. Debriefings. Suggestions of draft changes according to experience acquired (**last quarter of 2023**).
5. **2024 CIMA Plenary**. Presentation of consolidated and final ASC Rules DRAFT to be approved.

# ASC Working Group technology

- ALDS - Automatic landing detection system. Under development. Current state TRL 7-8. Already acquired by France, Czech Rep., Norway, and Spain. Successfully tested in their competitions by Norway and Spain.
- Live tracking software. Needs high capacity server.
- **New!** Working in an OnBoard mini computer (RPI). 4G/LTE connection sending data:
  - 3 cameras with video/audio to be streamed.
  - geo positioning for live tracking with high quality GNSS devices.
  - 3 SIM Cards for bandwidth bonding.

# WMC2024 - Update on Progress

22<sup>nd</sup> February: Owain Johns, Competition Director

**July 29<sup>th</sup>, 2022**

Czechia, Hosin, Hanger Dance.....

The planning starts

## WMC 2024 - Aims

- To Fly safely
- Enjoy the Flying and have fun together as a flying community
- Reward and recognise piloting skills

# Progress to date

## **Darley Moor – April 2023**

Early testing of Scoring system in UK Open Series  
Proving of concept – utilising ‘Pesto’

## **'Grande Open' - July 2023**

Successful test event hosting approx. 25 aircraft from 5 countries to prove Deenethorpe as a venue.

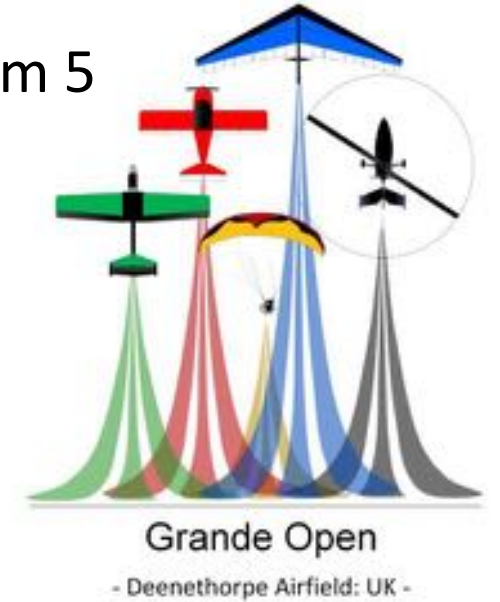

Positive feedback received, lots learnt.

## **NEW FARM - September 2023**

UK open series provided further opportunities to test, trial and work with scoring and task design

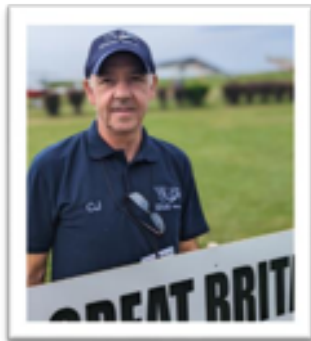

# Organisational Team

- Established team in place and working well together
- Monthly management meetings
- Face to Face meetings on site
- Training onsite
- First Aid Training and Risk Management
- High quality communication is a focus
- Website and social media content established early on
- Pre-registration introduced

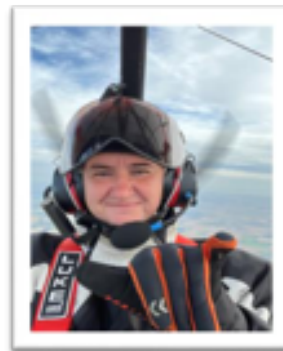

**Competition Director**  
Owain Johns

**Deputy Director**  
Colin Johnson

**Chief Marshall**  
Tim Burrow

**Chief Scorer**  
Angela Cox

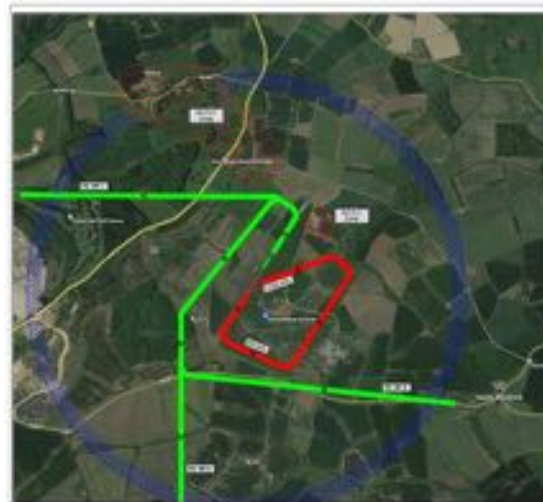

# Pre-registration update

# 5 months to go

- Monthly bulletins and pre-briefings to teams planned
- Detailed task design underway
- Final test event at Deenethorpe planned for May – Round 2 of UK Open series
- Tasks flown at Open Series will be available for practice week
- ‘Outline’ briefing a month before event with concept of tasks published to all competitors before arrival
- Aim is to enable competing pilots to have as much information to ensure a smooth start to briefings and practice week

# 5 months to go

- Catering team in place with theme nights and app booking
- Toilets and facilities in place
- Connectivity (4G / 5G) proved and sufficient capacity
- Marshall team being formed
- Media team, Vlog, photographer in place
- Strong sponsorship support from UK Microlight industry
- Additional Campsite space being planted
- Opening /Closing ceremony and social activities being planned

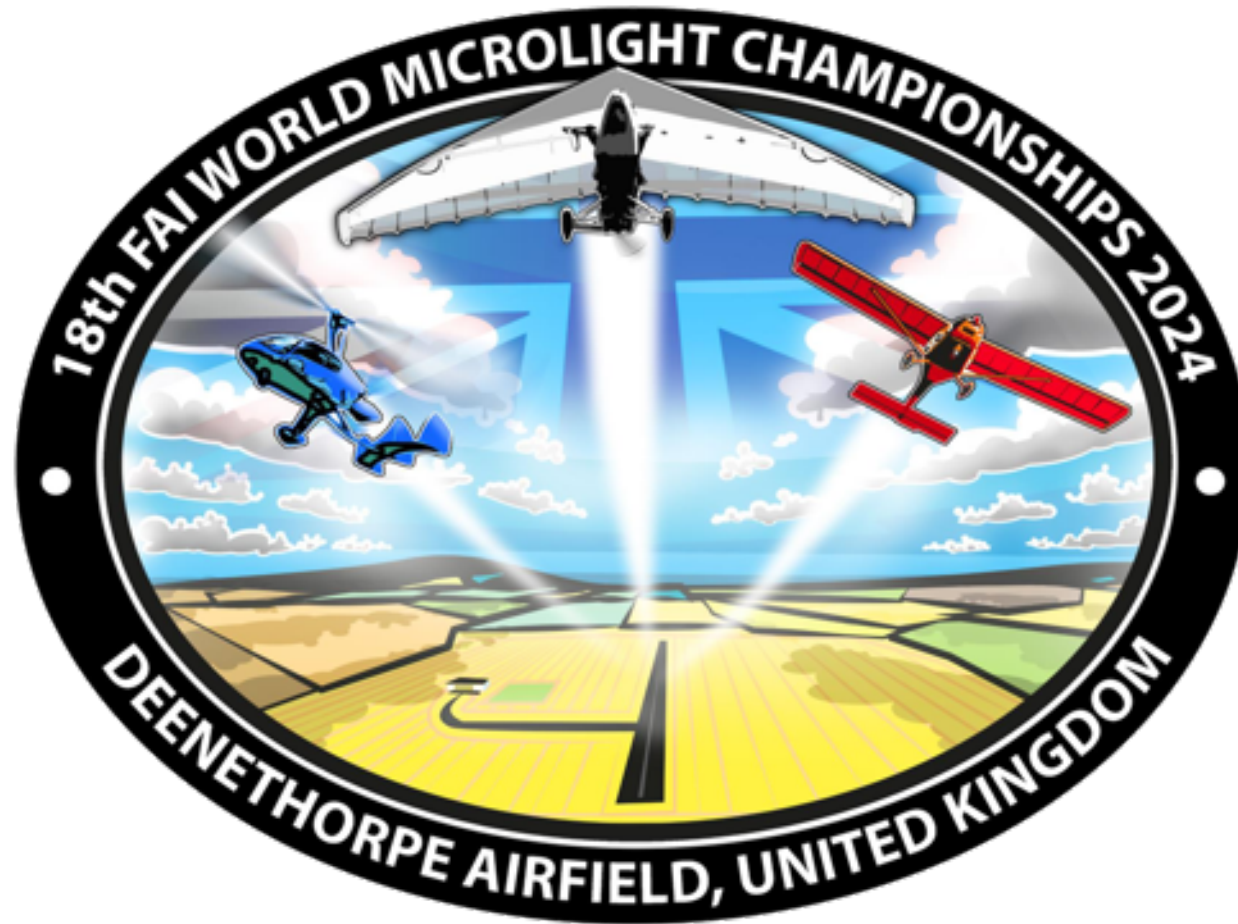

# Thank you to all our Sponsors

# Thank you – Questions ?

# 18TH FAI WORLD MICROLIGHTCHAMPIONSHIPS 2024

[HOME](#) [NEWS](#) [SPONSORS / PARTNERS](#) [BRIEFINGS](#) [RESULTS](#) [AIRFIELD](#) [ABOUT](#) [CONTACT](#)

27th July - 3rd August 2024

Welcome to the official website for the 18th FAI World Microlight Championships.

This is an international CAT1 7 day competition to be held at Deenethorpe Airfield in 2024.

[Register your interest](#)

SCROLL  
↓

# ASC Working Group proposals

- Creation of an ASC permanent Sub-Committee.
- We need more countries to adopt the new rules for testing experiences.
- ASC global unique brand image, website, social networks.
- Search for a global sponsor partnership. We need to guarantee good livetracking service.
- Promoting eSport globally. It might generate extra income.

# CIMA - WG IT

Wiki Migration Project

Part 2

Version 3.1

**Michael KANIA (GER)**  
**Patrik Aussems (BEL)**  
**Lukas BEHONEK (CZE).**

# What we wanted

- An application which is running on the FAI server farm
- High availability of administration and support
- User management by FAI IT
- Support and maintenance by FAI IT
- Closed application for CIMA delegates and the CIMA buerau
- No public access, only registered users have access
- Public information should be published on FAI CIMA Website
- Ample search function
- Office apps implemented and easy to use
- No monthly fee

# The tools we use

## Calendar

A CIMA internal calendar which shows events, due dates etc.

## Bookmarks

Bookmarks make information and data more organized.

## Files

Any content we have to store like office documents, pictures etc.

## Deck

Space for your latest work e.g. for CIMA plenary preparation.

## Search

Search for files, comments, deck, bookmarks etc.

## Forms

You can ask questions or write comments to the bureau or other groups.

## Notes

Room for your personal notes.

## Office

Tools like Excel, Word or Powerpoint allow the online work on documents.

## Contacts

All users you can share content with.

# Calendar

After successful login you will see at first the calendar, to keep you up to date.

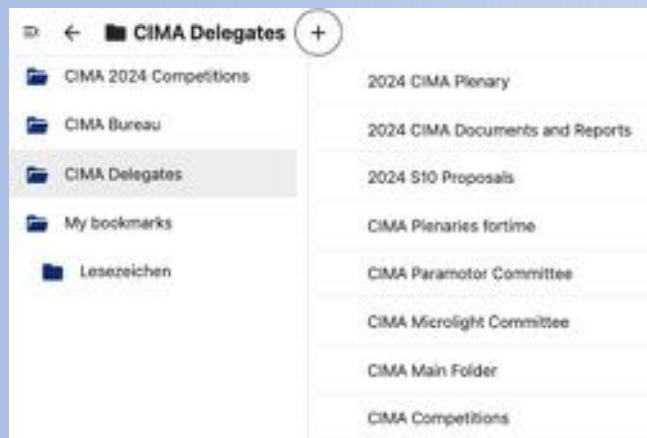

You will see the CIMA calendar entries, you also can make your own entries.

To see a particular calendar, the radio button on the left must be checked.

# Bookmarks

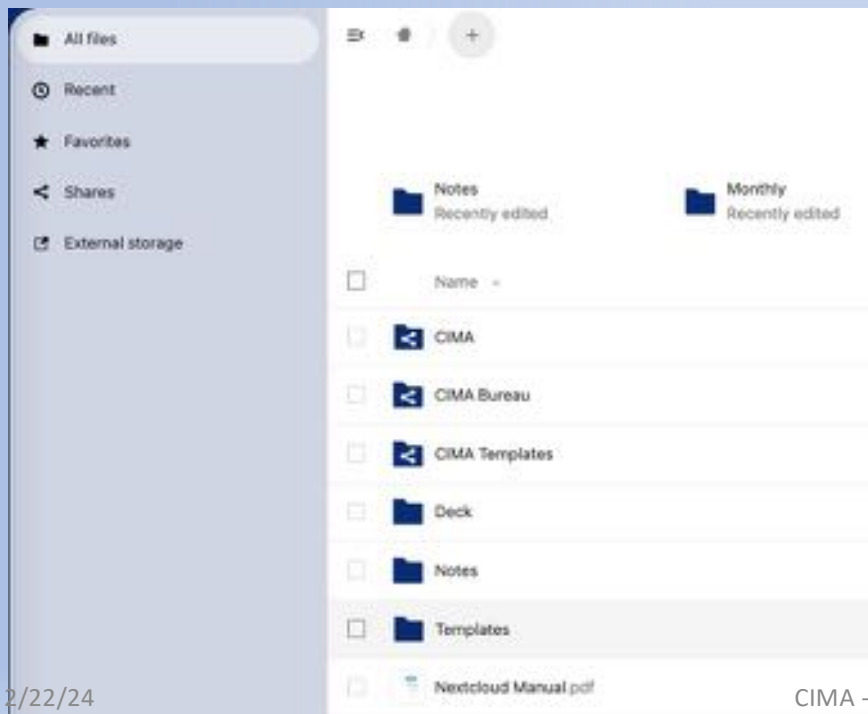

A useful starting point for your work could be Bookmarks.

The left column shows the bookmark folder. The right column the bookmarks itself.

There are some prepared bookmarks. You can add your own folders and bookmarks, if you want.

# Files

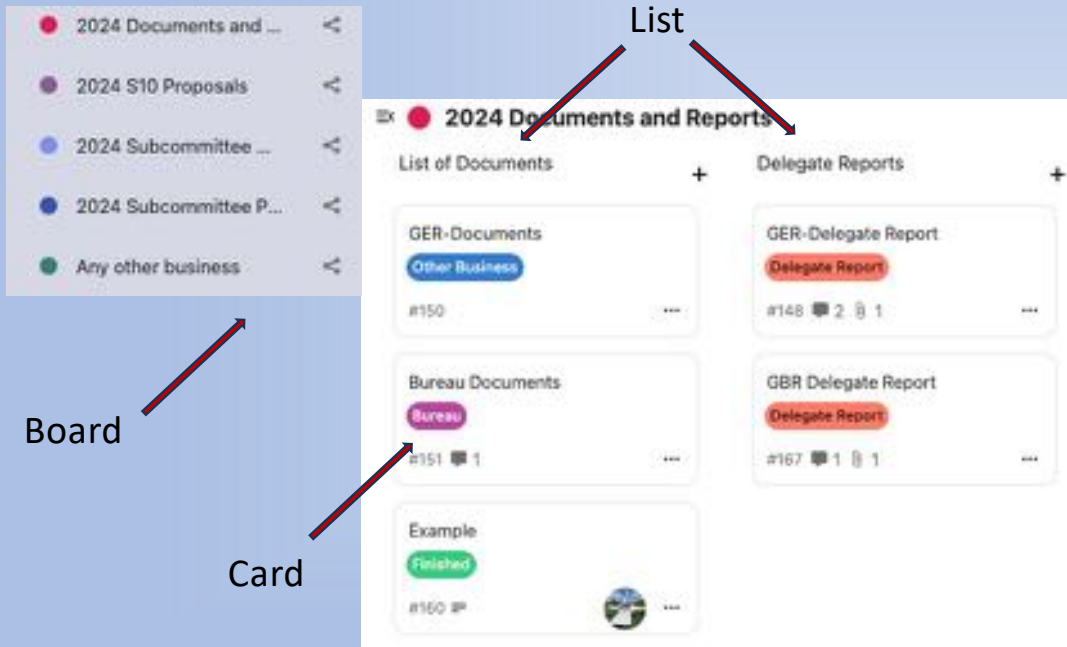

Files gives you access to all information of the FAI/CIMA Cloud, in most cases in read only mode.

A folder with such an icon  belongs to your personal area. This folders are fully accessible for you (read/write/delete)

A folder with such an icon  is shared with you by others, the information owner can control your access rights.

To find information fast and easy you should use the bookmarks or the search function as described later.

# Deck, Boards, Lists and Cards

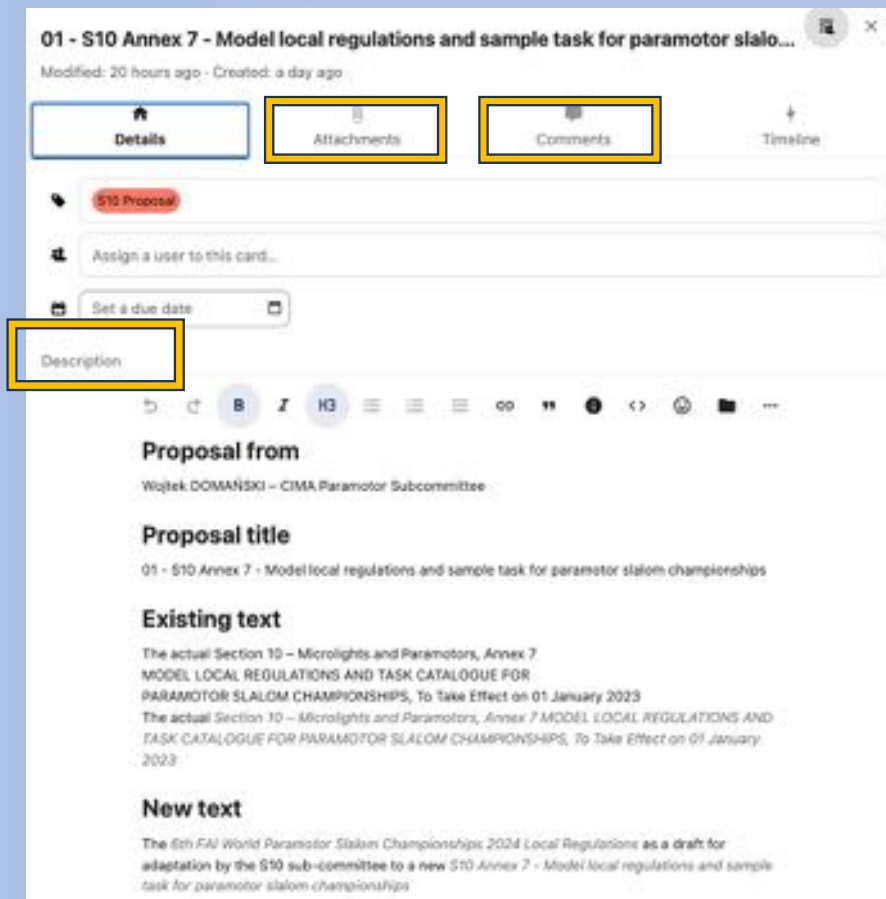

The most important and powerful tool is the Deck. It is like a desktop where you can make your work e.g. in preparation of a plenary.

The deck contains boards. Boards have one or more lists, lists contains cards.

Cards are like record cards on your desktop. A card has a label, a description, and a due date if needed.

You can attach files to a card, you can leave comments in a card. Cards can be shared with users or groups as well as moved to other boards or lists.

# Deck and Cards

Use the register card Details to assign

- a title
- a label
- a user (optional)
- a due date (optional)

to the card.

The Description field is the field, where you can write or copy/paste the text.

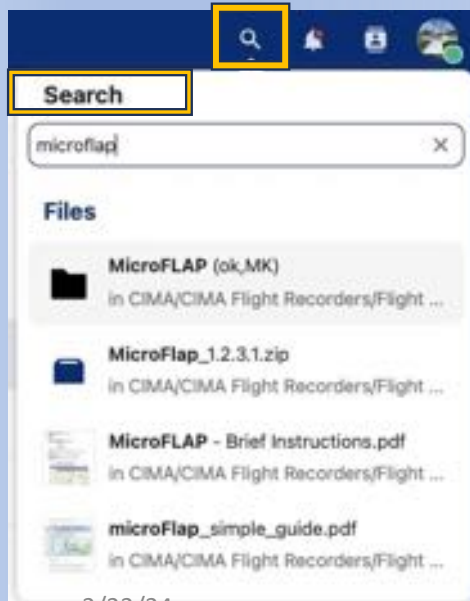

The register card Attachments allows you to attach files to the card.

The register card Comments allows you to add comments to a card.

# Search

The search function is looking for the desired content in comments, bookmarks, notes, folder, filenames and the deck.

You need at least read rights for a file, folder or App to find this information.

To limit the number of results you can choose to search either for files or for deck.

# Forms

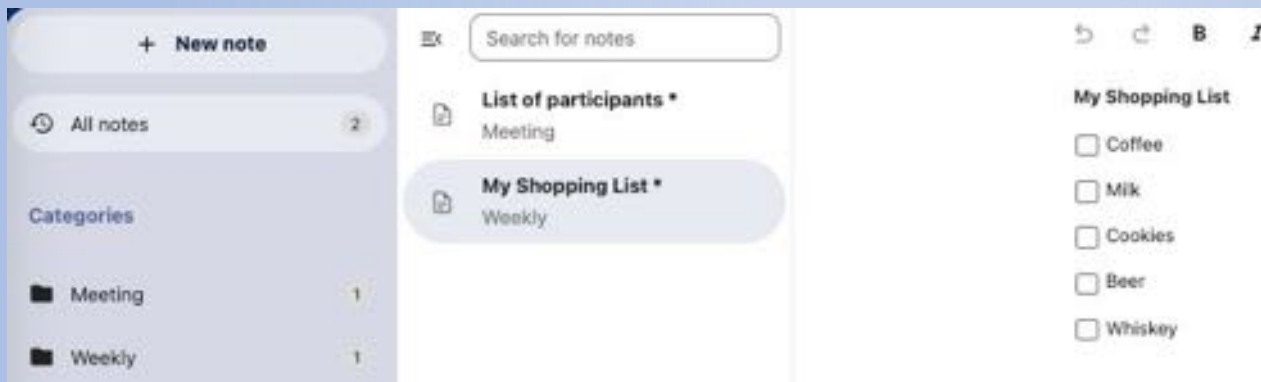

A screenshot of a web form titled 'I have a Question or Comment'. The form is divided into two main sections. The left section is a sidebar with a '+ New form' button at the top, followed by 'Shared with you', 'CIMA Cloud Access', and 'I have a Question or Comment' (which is selected). The right section contains the form content. It starts with a heading 'I have a Question or Comment' and a paragraph: 'Please write your question or comment. CIMA Bureau is the recipient and will forward your message to the responsible person. Thank you!'. Below this is a note: 'Responses are connected to your Facebook account.'. Then, there is a section titled 'Which group concerns your question or comment?' with a list of checkboxes: 'CIMA Section 10 Sub-Committee', 'CIMA Competitions', 'CIMA Penary', 'CIMA Bureau', 'CIMA President', 'CIMA Delegates', 'IT Support', 'CIMA Microlight Committee', and 'CIMA Paramotor Committee'. Below the list is a text input field with the placeholder 'Please write or copy/paste your question' and 'Enter your answer'. At the bottom right of the form is a blue 'Submit' button.

The CIMA bureau can create questionnaires or surveys for particular subjects.

This example allows you to ask questions to the bureau or other CIMA groups.

On the left hand you will see all forms which are available for you.

# Notes

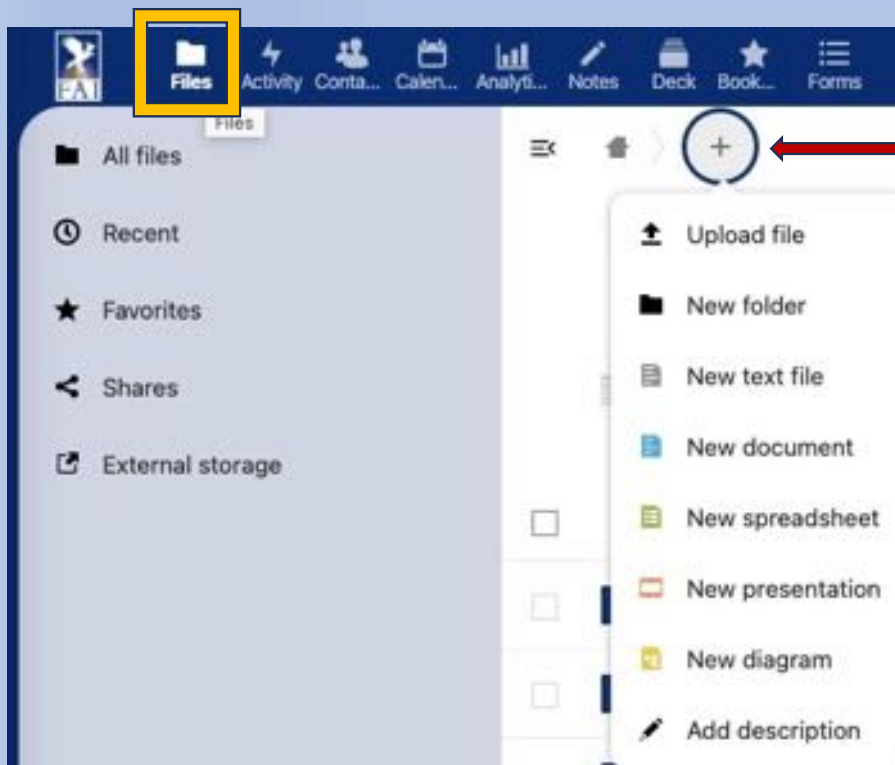

Notes should be used for Information which are not to be assigned for other delegates or admins.

It is not possible to share your personal notes with others directly.

# Office and more

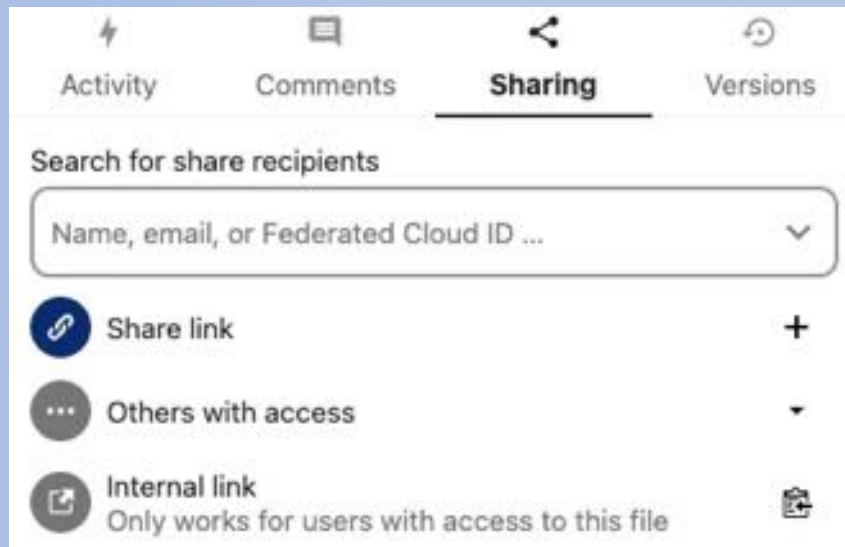

Within the Files area you will find some Office Apps and more options by a click on the + icon.

You can add or upload office documents to your own folders, add subfolders and descriptions.

If a description exists, the text will appear at the top of a folder. The name is always readme.md.

# Share files

Documents created or uploaded to your personal folders are not readable for others. Nevertheless, you can share files or folder with others.

## **Share Link:**

The file or folder is public reachable!

## **Others with access:**

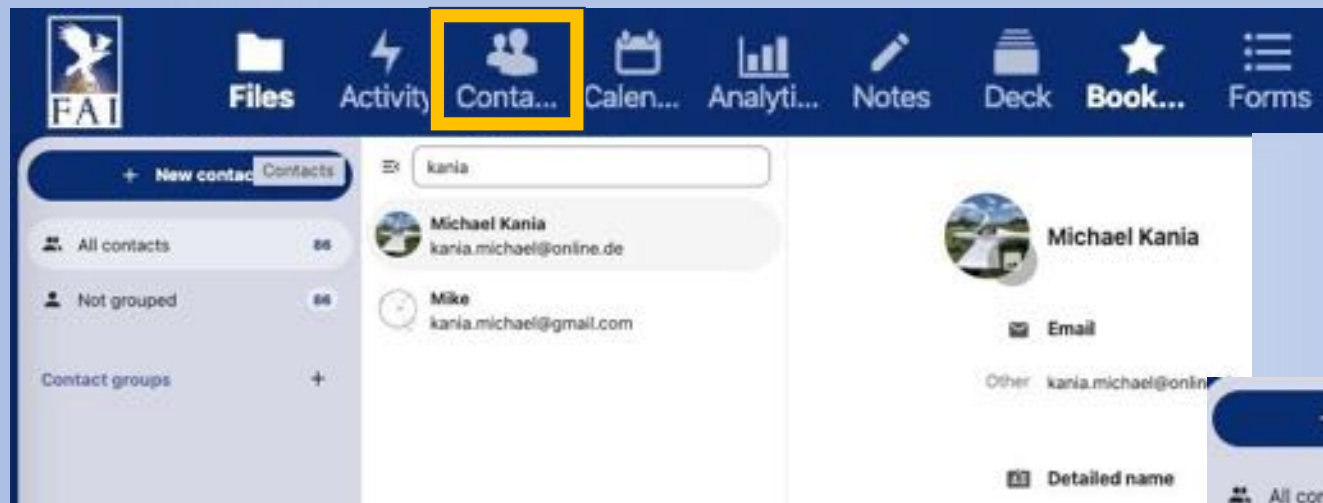

Allows access only for internal user or user groups.

## **Internal Link:**

Works in combination with Others with access

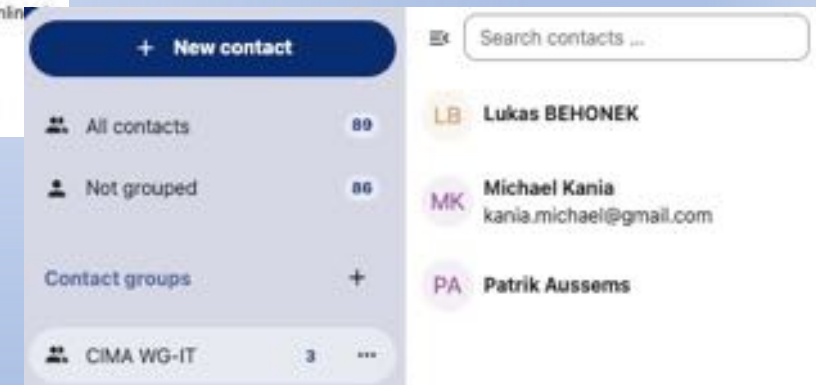

# Contacts

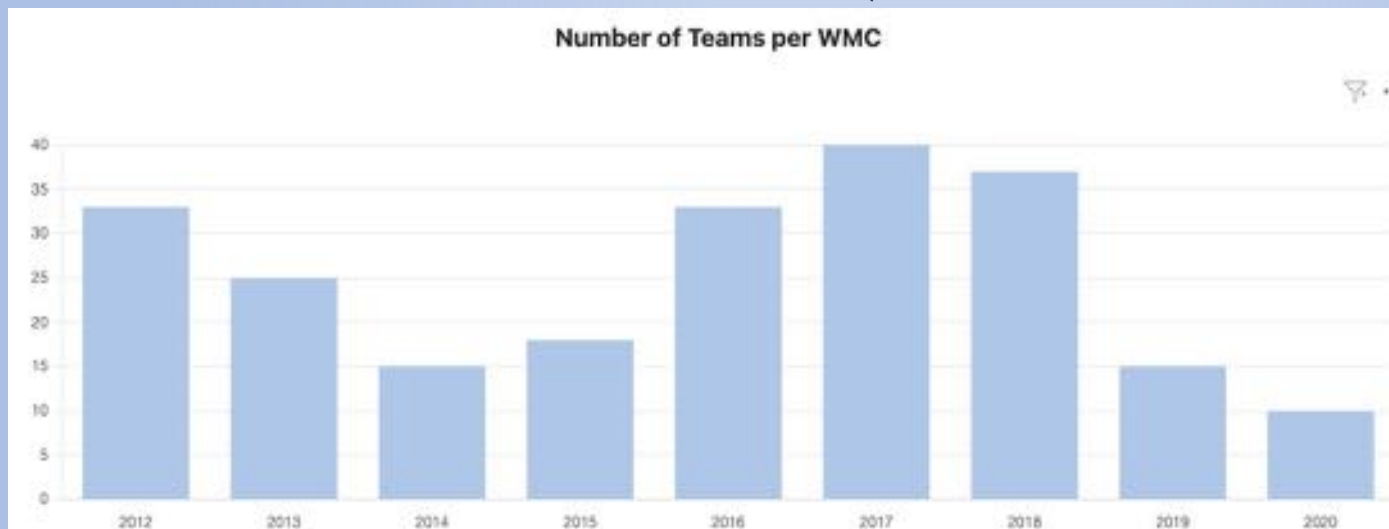

To find contacts either view the whole list or enter a search criteria to limit the results.

Contacts is not limited to CIMA; you will find all people which are using the FAI cloud.

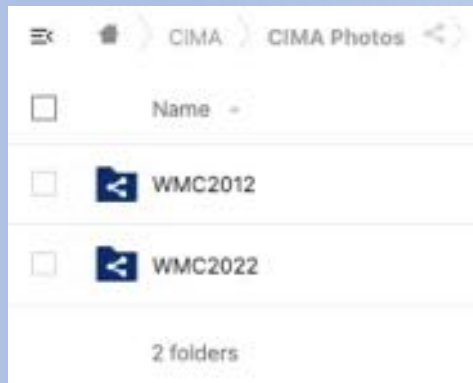

# Yet another tool - Analytics

Analytics grants the possibility to present numbers in a chart.

This is a nice tool for the bureau to create graphical presentation.

# Pictures and Photos

There is sufficient space to store thousands of photos of competitions and plenaries.

An easy picture viewer and a slide-show function is available.

# One more tool - Activity

Activity is a logbook which shows all activities from you or other users, which have common access to shared resources with you.

# Summary

Deck

All users - current plenary topics, competitions, discussions

Bookmarks

All user – major topics and information

Files

Bureau, IT - large bulk of data, the past

Calendar

All users - organize yourself

Search

All users - find information easy and fast

Forms

Bureau, IT - polls, questionnaire, requests

Notes

All users - for your personal use

Office

All users - read, edit or create documents

Contacts

All users - Who is who

# Questions

# 16<sup>st</sup> European Microlight Championship 2025

By Laurent RAPITEAU & Pascal NOIROU  
FFPLUM- FRANCE  
February 2025 - KAUNAS (Lit)

# Where is Chambley ?

Easy to acces :

Highway, trains, flight, central Europe localisation

# EMC 2025 in Chambley : Description

Iconic place with numbers of historical aerial events: former OTAN airfield, then military place and finally public activities

Many and famous events like Mondial Air Balloon every 2 years ( more than 100 000 people), French Federation Championship Microlights and Paramotors, large events ...

Authorities and Public services are deeply connected with the Chambley structures and Team

# Key figures of Airfield LFJY

Chambley is

- Airfield surface more than **500** hectares
- 2 huge, recent and functional hangars ( more than 2400m<sup>2</sup> each), **for Microlights**
- Large space, all equipment
- Runway : 05R/23L 2100m X 45 m paved
- 05C/23C 770m X 80m grass
- **05L/23R 660m X 18m paved dedicated for Competition tasks**

# Commodities in Chambley structure

Mechanical tools, power, Gas station (UL91)  
on site UnLead 95 etc...complete support to  
practice Microlight in comfortable and safety  
conditions.

Office room dedicated for the Championship.

Wi-Fi, kitchen, cafe machine and bar all day  
on site

On site local camping and accommodation for  
competitors and staff possible.

Hotels or private sites proposed around  
airfield (list will be spread)

Restaurant close to runway for competitors  
and staff.

# Airspaces

As Airfield authorities works very closely with DGAC (French Regulation), specific and temporary rules will be settled for championship in Chambley, to assure the high level of safety for all (Users and competitors)

Dedicated working and local group will be defined for these aspects, with local authorities.

# Organisation Team

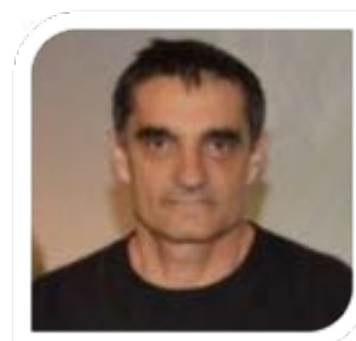

Championship Director  
**Laurent RAPITEAU**

Former International Microlight Champion

Assistant  
**Georges MONIER**

Former International Microlight Champion

Scoring  
**Christophe LEFOULON**

Microlight Pilot, Creator of ACOL system

Chief Marshals  
**Georges HUMEAU**  
Member CRULM  
Regional Comitee

## Tasks & Sustainability :

- The task catalogue will be based on FAI Local regulation rules.
- To limit our impact on environment, we will build shorter tasks on flight time, and limited high-speed tasks.

# Possible Classes :

- The Championships may be held in the following classes :
  - WL1 & WL2
  - AL1 & AL2
  - GL2

Each class is a championship in its own right, and as far as possible interference of one class by another shall be avoided

# Software for scoring : ACOL

- Used for several years in France, for regional and national competition (ClassicClass and PPG) the ACOL has long experience in a sportive context. It's a bespoke built software created and managed by C.LEFOULON
- The software is adapted to use and launch all FAI tasks, with a fast and reliable correction's system. Export to a dedicated website, access for team leader for scrutinise the tasks
  - Can integrate all tasks even the new one, (UK Circle task).

- 3-axis
- Autogyro

And open to all Pilots

# SHORT TAKEOFF AND LANDING

# SHORT TAKEOFF AND LANDING

Since 2020, a national championship has been organized in France.

The annual circuit includes:

- 4 regional competitions with validated scoring
- The final of the circuit which is an open French championship

# SHORT TAKEOFF AND LANDING

France proposes to offer pilots the opportunity to discover this technical and demanding discipline, and share its experience with the FAI.
