

CIVL 2019 PLENARY – ANNEXE 25A
HANG GLIDING COMMITTEE PROPOSAL – ORDERED LAUNCH

Note that the under ordered launch procedures appear only in the local regulations template. Section 7A only indicates that an ordered launch may be used per the local regulation. So, no change to Section 7 is needed, only a change to the local regulations template.

Ordered launch will be used throughout the Competition in the following manner:

- 15 minutes for Early Birds followed by...
- On first day the top 30 from the registered pilots from the WPRS in reversed order, followed by all other pilots in normal WPRS order.
- On all other days: the top 30 pilots from the overall results in reversed order followed by the other pilots in normal order. The launch order will be confirmed and posted on the official board at the launch site every day. Positions to assemble gliders will be marked by corresponding numbers on the ground.

All pilots must be ready to launch and in their ordered position in the launch queue or will be placed at the back of the queue and will launch last in their launch line.

The proposal would add the last sentence in bold.
