

**CIVL 2019 PLENARY – ANNEXE 26B  
HG & PG COMMITTEE PROPOSAL  
XC DISTANCE MEASUREMENTS AND TOLERANCES**

**In Hang Gliding and Paragliding.**

**Proposal:**

In S7A-XC CIVL GAP – 8.1.1 Reaching a turnpoint cylinder

For Cat 1, set the tolerance to 0.1%.

For Cat 2, recommend a tolerance of 0.5% to allow pilots to still use equipment that calculates distances on the FAI sphere

**Recommendation:**

To continue analysing actual turnpoint errors, and potential turnpoint errors at lower tolerances.
