

Report for the IGC Ranking List for 2012

The Ranking list continues to grow with an increase in the number of pilots from 4,757 in 2010. to 5190 in 2011 and in 2012 reached 6,926, the rate of growth is continuing to slow as the Ranking List enters its 11th year.

Current plans for updating.

The Ranking List will be included in the new IGC competition web site but the database will remain on the FAI server. Once the new IGC site is operational it is intended to remodel the Ranking List presentation and integrate the data into features of the new site.

Administrator.

The Ranking list was designed by Keith Nicolson who has administered the system since the beginning and we are greatly indebted to Keith for his work. The administration of the system will be taken over by Paul Crabb who will work closely with the new web designers to integrate the Ranking List and to ensure the remodelling takes place without disruption to the system.

Two Seater rankings

As a result of last years Plenum vote the RL group have worked closely with the Italian NAC to submit a proposal at this plenum for changes to the way two seater entries are included.

Administration

Credit control is still an issue but we are hopeful that the procedures in the FAI office can be simplified to reduce the amount of work required to ensure timely payment of sanction fees.

For full details of prices and procedures you can go to the Ranking List web site "Enter competitions"
