

Education S/C
technical
meeting 2021

About myself...

- Teacher, married to Kati and 2 sons, Daniel and Oskar.
- Competitor in F1A, F1B and F3K
- Junior projects
- Contest organizer, CD, FAI jury
- Swedish CIAM delegate
- Lecturing
- Head of SMFF, Competitions Pilot group
- Some thoughts about CIAM Education S/C.

Agenda for today.....

Agenda for the Education S/C technical meeting March 27 at 9:30 CET

The scholarship, proposal from last year in this year's Plenary agenda.

Other scholarship matters.

The Rookie project.

Rules for new capacitor class.

Article published at the FAI-web. What we have done and the future.

Social media, ex the FB page we have.

Rules for new RC soaring class (Beginner class).

Other matters

b) A.14 Aeromodelling Scholarship

Education Subcommittee

Transferred from 2020 Plenary Meeting, and will be put forward if appropriate (see note below). Amend sub-paragraph A.14 e) as follows:

e) Payment

- i) The FAI will transfer the Scholarship award of ~~2,000~~ **2,500** Euros to the awarded student, or his/her parents or his/her guardians after all valid receipts which justify the full amount of the Scholarship have been submitted.

Reason: To keep the value and status of the scholarship we must follow the changes of value of money over time. The amount of 2,000 Euros has stayed the same since the scholarship was first started and it's quite a few years back in time. So we think 2,500 is a good amount to keep the same status of the Scholarship today as when it started.

Technical Secretary Note: In 2020, this proposal was withdrawn by the Education S/C Chairman and was not included for approval by the Plenary. The reason for withdrawal was because of the current situation with COVID-19 and so many events cancelled or postponed; the CIAM financial situation was not as it was when the proposal was submitted. The delegates attending the meeting unanimously recommended to consider this proposal when appropriate.
