

**CIAM RC PYLON RACING Technical Meeting 2022  
e-Meeting on Saturday April 9th 2022 at 19:00 hours (CEST)**

**Introduction and procedures**

CIAM technical sub committees work on a two year rule cycle and the F3 Pylon rule cycle is set to discuss and vote upon rules in uneven years (2021, 2023 etc.)

Therefore 2022 is not a year to formally discuss and vote upon rules, however the F3 Pylon sub committee feel there is merit in discussing the CIAM pylon racing competitions and what the year 2022 and the future hold for RC pylon racing at an International level.

Because of the relatively informal nature of this meeting we can work with a fairly loose and free agenda such as set out below.

**Agenda**

- Introductions
- Update on World Championships, Muncie Indiana.
- F3E limiter update.
- Future World Championship bids, 2023, 2025, 2027.
- Bringing new countries into F3 pylon racing.
- Ideas for the future of electric pylon racing.
- Formation of a development group within the sub committee.
- Any other business and Q&A.

Barrie Lever  
CIAM F3 Pylon sub committee Chairman
