PROPOSAL REGARDING THE AGE OF THE JUNIORS FOR 2021

Subject: Due to the Corona Pandemic, the Juniors born in 1996 could not compete in the World Championships 2020 (postponed to 2021). In many countries, this led to a lack of important Junior results and the classification with the National Olympic Federations could not be made. This also means that the associations may lose important financial resources. This is also the case in Switzerland.

For this reason, many other sport-federations have raised the Junior age limit for the 2021 season by one year. This means that the best Juniors, in their last year, still have the chance to prove their long-standing athletic development at the most important events. The increase should be valid for FAI/ISC EM and FAI/ISC WM and only for the next year.

Request: Increase of the Junior age in the skydiving disciplines by one year, only for the 2021 season.

Niederhasli, 19.11.2020
