PARACHUTING AIRCRAFT INCIDENTS 2021

Technical & Safety Committee

International Skydiving Commission (FAI)

IPC Plenary Meeting, Bucharest, Romania, 28 – 30 January 2022

This listing is being distributed by the ISC's Technical & Safety Committee, to ISC Delegates at the ISC Plenary Meeting, held in Bucharest, Romania, 28 – 30 January 2022, and by e-mail to Parachuting/Skydiving Technical & Safety Officers.

INCIDENTS RESULTING IN FATALITIES OR INJURIES

<i>Date</i>	<i>Aircraft Type</i>	<i>Details of Incident</i>	<i>Injuries</i>	<i>Fatalities</i>
19.06.2021	Let L410-UVP-E	The Turbolet crashed, while on a parachute flight, close to the airfield from which it had taken off. Preliminary information suggests the No.2 engine failed shortly after take-off. The aircraft impacted a field when the pilot attempted to turn back.	Unknown	5 – 3 Skydivers 2 Crew
09.07.21	DHC-2 Turbo Beaver	The aircraft carrying 8 skydivers, crashed shortly after takeoff.	0	9 - 8 Skydivers 1 Pilot
26.07.21	Cessna 208 Supervan	A Cessna 208 Supervan was destroyed when it impacted the sea. The sole pilot on board was fatally injured. The Caravan took off and dropped parachutists at 14,000 feet. The aircraft did not reach its intended destination, the airfield, and crashed into the sea.	0	1 - Pilot
10.10.21	L410	Left engine failed shortly after take-off and the aircraft was attempting to return to the airfield when it crashed into a concrete wall and a log pile.	4	16 14 Skydivers 2 Crew

INCIDENTS RESULTING IN DAMAGE TO AIRCRAFT OR PROPERTY, OR NO DAMAGE.

<i>Date</i>	<i>Aircraft Type</i>	<i>Details of Incident</i>
05.06.2021	Cessna 208B Supervan 900	A Cessna 208B Supervan 900 suffered a nose landing gear collapse while taxiing after landing. All five propeller blades separated after the propellor struck the ground. The aircraft was engaged in dropping skydivers and had just returned from having made a drop.
25.06.2021	Cessna 208B Supervan 900	A Cessna 208B Supervan 900 carrying 18 skydivers sustained substantial damage during a forced landing in a field. The engine had lost power shortly after take-off.
17.07.2021	Cessna 208B Supervan 900	A Cessna 208B skydiving plane suffered an accident while landing. The aircraft had dropped skydivers at an altitude of 13,500 feet and descended back towards the airfield. During landing the nose landing gear collapsed. The aircraft came to a stop nose down at the edge of the grass runway. Unconfirmed reports suggest the aircraft had engine problems on approach, possibly touching down just outside the runway.
25.09.2021	Cessna 208B Super Cargomaster	The Cessna 208B Super Cargomaster skydiving plane suffered an accident on landing. The aircraft had just completed the final stick of the day and landed back at the airfield. It came to rest close to the runway. Eyewitnesses reported that the aircraft landed short of the runway. Photos from the scene seem to indicate that the right-hand main gear had collapsed.
