ISC Judge Video Librarian Report - 2023

by Tamara Koyn, acting ISC Judge Video Librarian
November 2023

The previous ISC Judge Video Librarian report was for 2022, Agenda 20.1.

2023 FAI Sporting Code - Section 5 (SC S5):
4.9.3. Recording Media, 6.2.3.2(ii)(a), and 6.9

If there are any questions, please contact ISC Librarian Tamara <Tamara@Koyn.com> and Zeljko Tanaskovic <zeljko@zeltan.org>, Chair of the ISC Judges' Committee.

In addition to providing for SC S5, the purpose of the ISC Library includes maintaining a thorough archive of past competitions, as well as maintaining a complete resource for ISC judge training courses.

2023 Status:

1) On September 17, 2020, it was announced on the FAI web site (at the below URL) that FAI/ISC judges may receive free access to the ISC Library. This allows FAI/ISC judges to refresh their judging skills. This program is still available.

<https://www.fai.org/news/isc-judge-training-opportunities?type=node&id=24670>

Judges need to send their request for ISC Library access to Zeljko Tanaskovic. And, they need allow for up to a few weeks for processing of that request.

2) For 2023, WeTransfer (cloud storage) subscription for one year was purchased for the ISC Library.

3) Since 2022 Agenda 20.1, the following two competitions were added to the ISC Library.

4th FAI World Indoor Skydiving Championships 2023
Hurricane Factory Tatralandia s.r.o., Slovakia - April 19-22, 2023

Note: 2013 DIPC4, 2014 DIPC5 and 2018 WCIS freestyle with music are available ONLY for FAI judge training courses and evaluations.

Anyone conducting a course or evaluation should communicate with Zeljko Tanaskovic and the ISC Judge Video Librarian to request videos, data, and documents.

Important! Course instructors need request materials at least 4 weeks before their course so materials may be provided on time! These files are large. Even though recent competitions can now be made available via internet download (with lower

resolution videos), a strong internet connection is required for a course instructor to be able to download competitions in a timely manner.

5) FAI/ISC USB 3.0 "shuttle" hard drives:

There are currently four (4) "shuttle" hard drives:

- one (1) 2 TB HD
- two (2) 1 TB HD, and
- one (1) 500 GB HD
- one (1) 3 TB HD (former master HD with Zeljko)

(Zeljko's Master copy of ISC Library is now on the 5 TB HD purchased in 2022.)

2023 ISC Judge Video Librarian Expenses:

\$23.40 USD - March 4, 2023 - postage to ship FAI/ISC "shuttle" HD to Rina to acquire 2023 WISC data

\$120.00 USD - March 13, 2023 - One-year WeTransfer

\$28.05 USD - June 8, 2023 - postage to ship 5 TB ISC Library master HD to Zeljko Tanaskovic

\$12.00 USD - September 11, 2023 - reimburse Bryce Witcher's postage for return shipping of FAI/ISC "shuttle" HD with 2023 WISC data

Discussion Points for 2023:

1) archive of Competition and Performance records. Currently, the ISC Library still does not have any media nor documentation of Competition and Performance records.

2) To practice judging accuracy landing, a request was made to the ISC Library for accuracy landing videos.

The 2023 competition rules state:

"6.1. Accuracy Landing"

...

"6.1.1.2. A Video system must be available and will be used for all competition jumps. Video system must be HD and capable of reduced speed playback at a minimum frame rate of 50 fps and be acceptable by CJ."

The 2022 rules used the language "may be used" The 2023 rules use the language "will be used" implying the introduction of mandatory video for all accuracy landings in 2023.

Accuracy landing videos have been described as being used only when a competitor "challenges" the judges' decision. It was explained, "you can not judge exact result from it. From those videos you can only see on which foot competitor landed first." Thus, there is no "point in saving and uploading those videos anywhere." If these videos were to be archived for every accuracy landing, there would be "more than 4000 videos ... Each jump is recorded with 4 cameras ..." It would "take some serious amount of time (weeks probably), to rewind, cut, export and upload ~4400 clips from 7 days of competition." Ulf has been requested to find out what the S&A committee has to say on this topic.

Conclusion

Competition videos, data, and pertinent documents are essential for developing judge skills and improving scoring systems as well as for competitors and future competitors to develop their skills. These materials are reliably available through the ISC Judge Video Library. And we want to preserve history.

I thank you for your time to read my report.
